

Level 0 DFD - Website Vulnerability Scanner

Context diagram

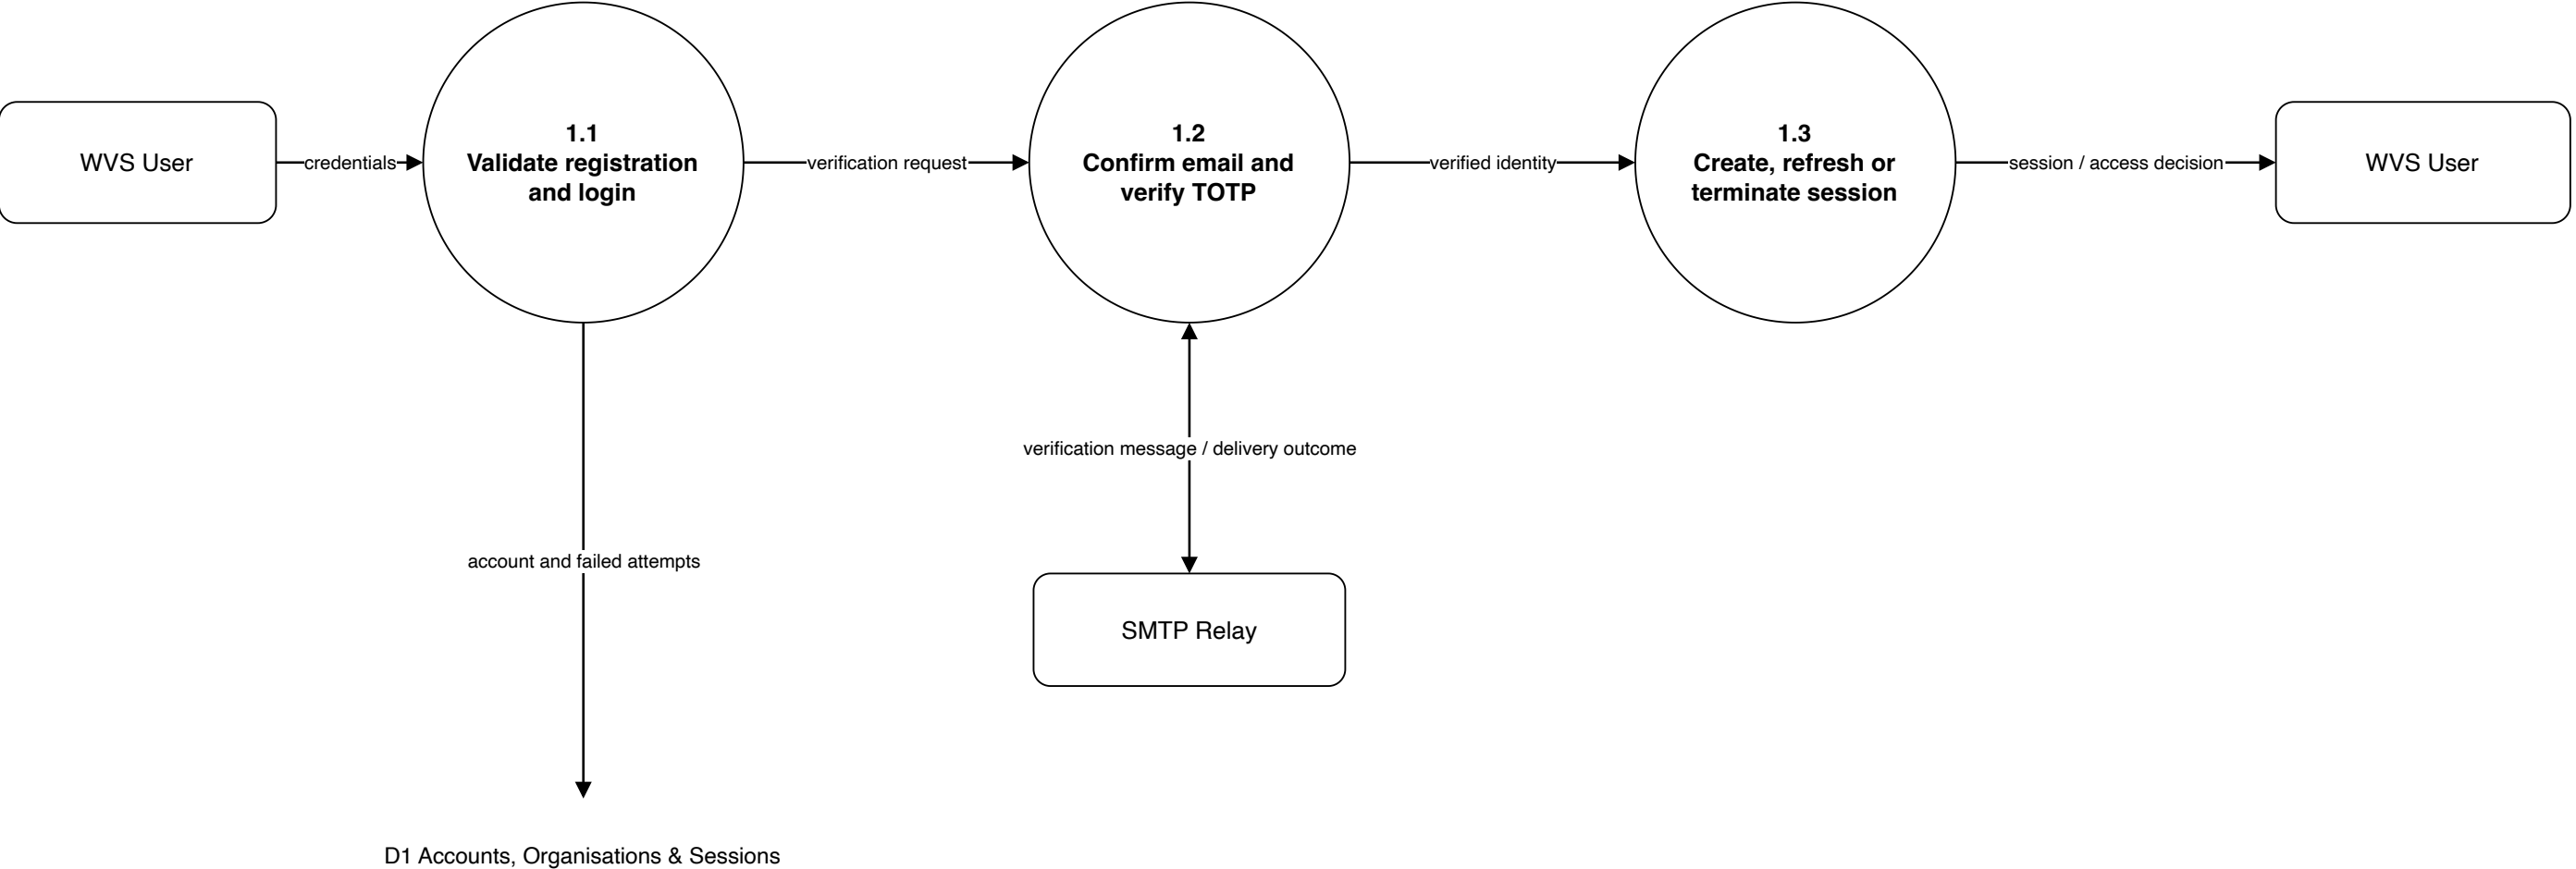

Level 1 DFD - Functional Decomposition

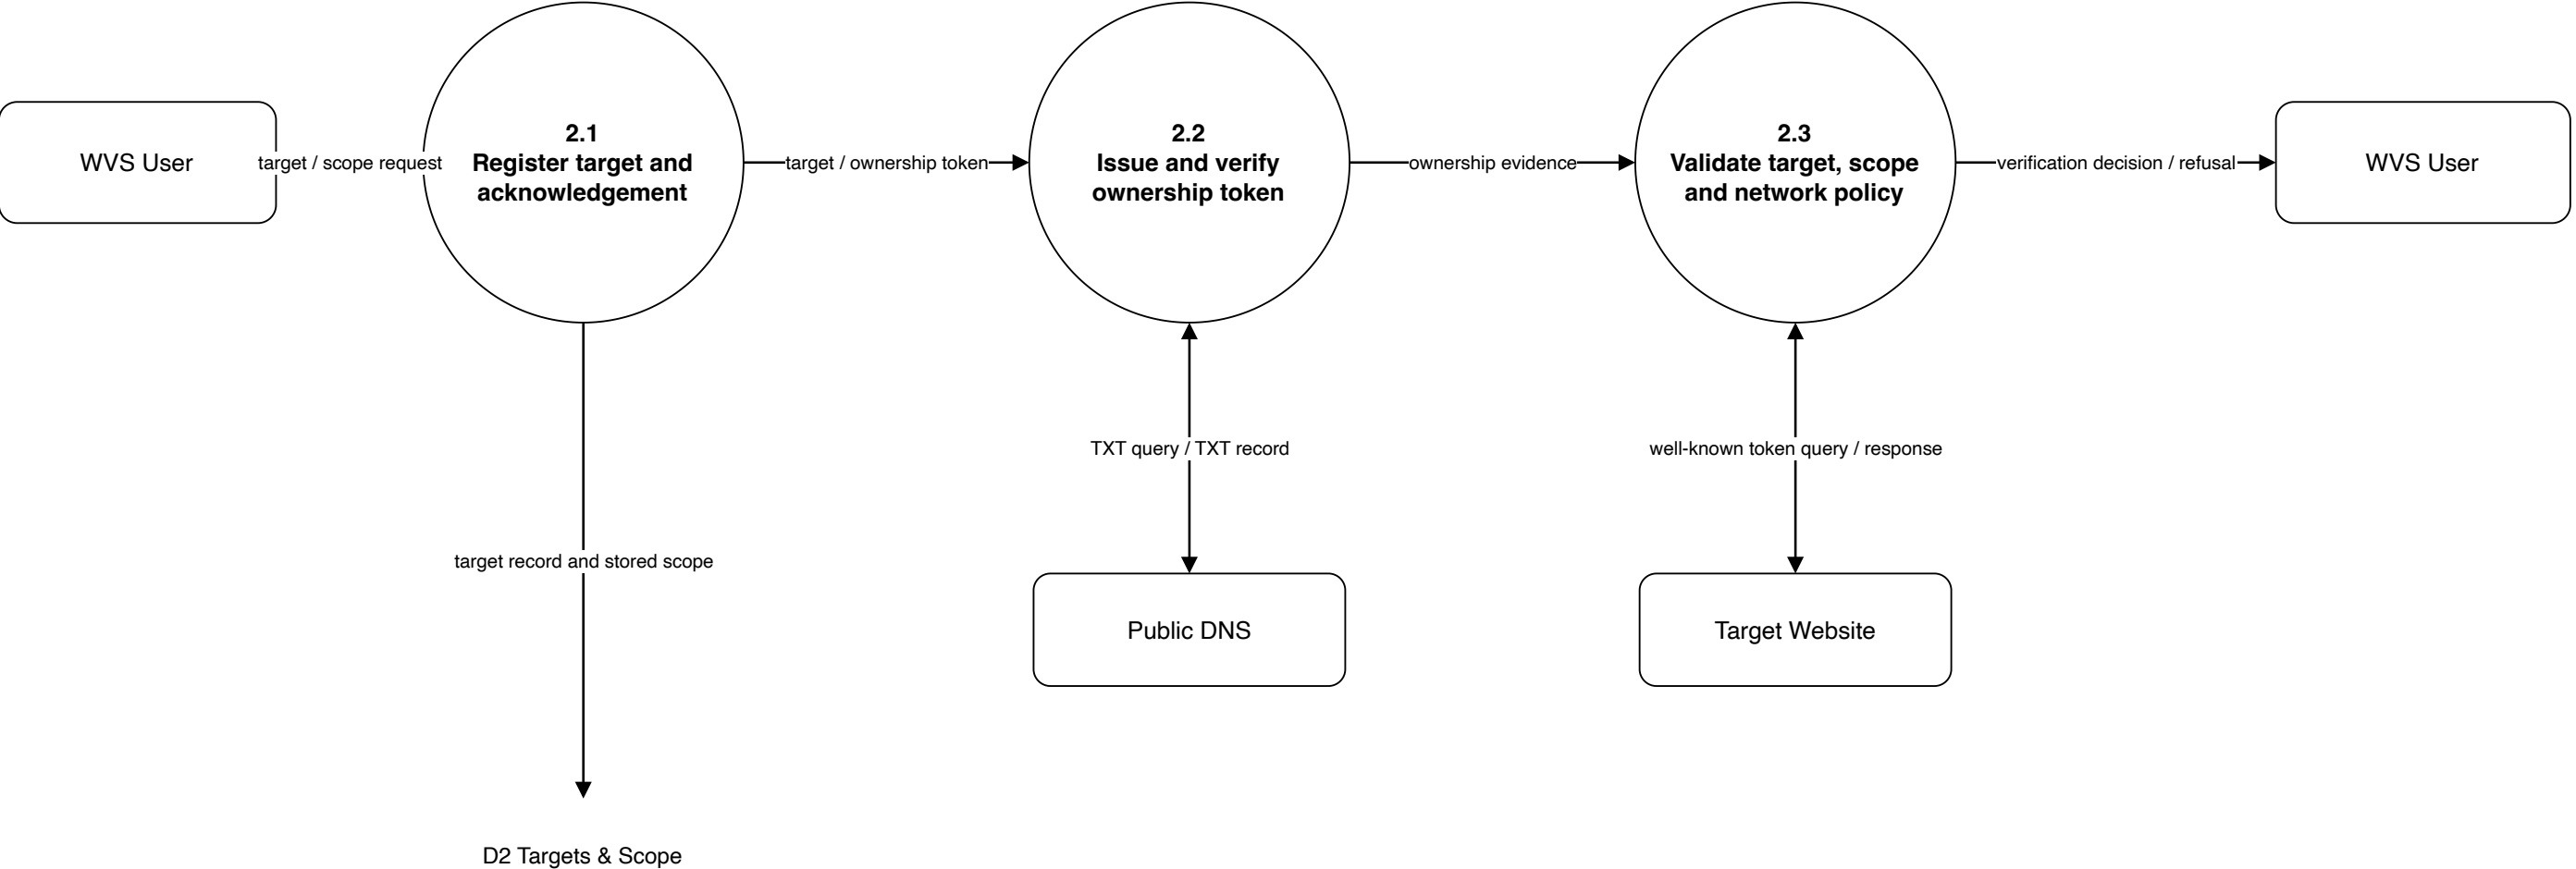

Functional requirements F.1-F.8

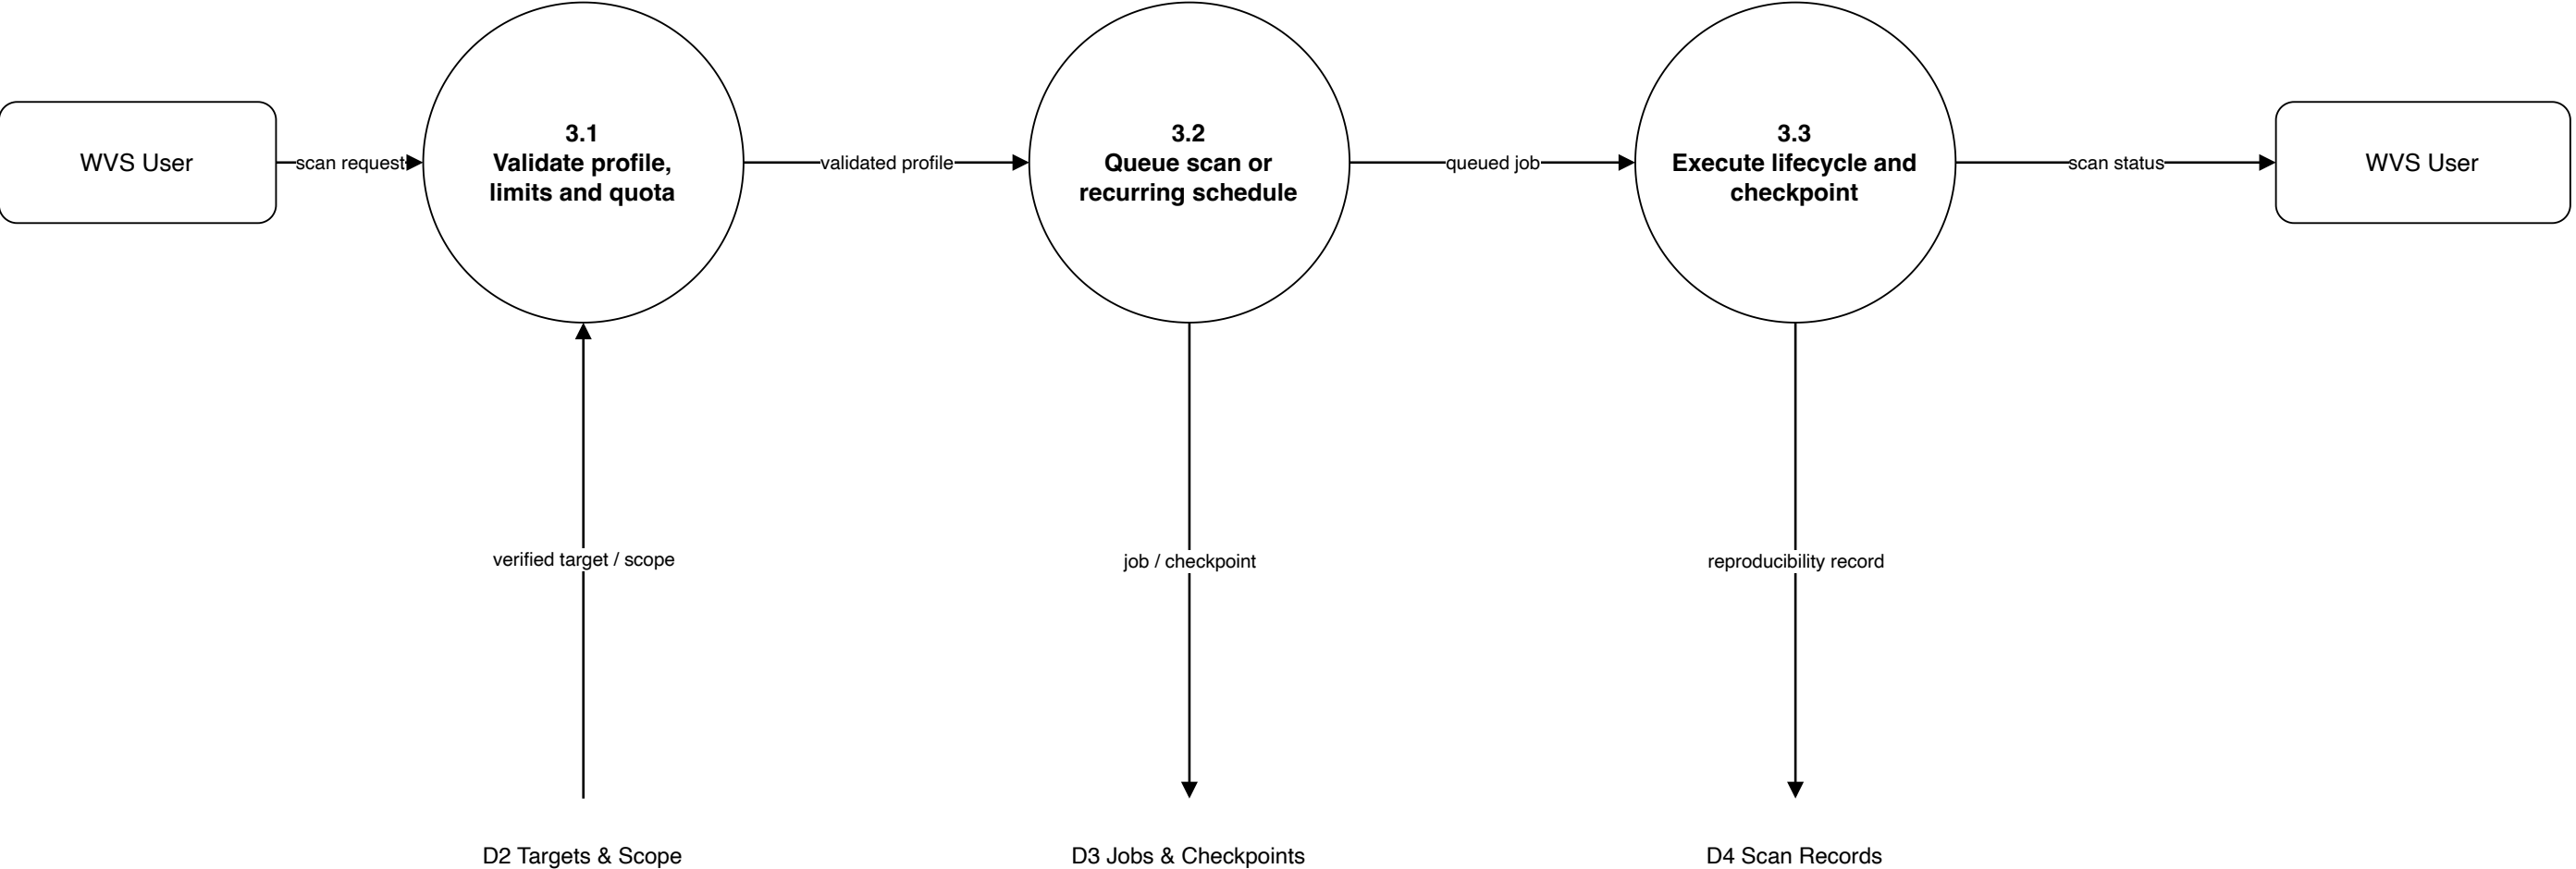

Data stores and their flows are decomposed in the relevant Level 2 DFDs.

Notation: external entity = rectangle | process = circle | data store = open-ended store

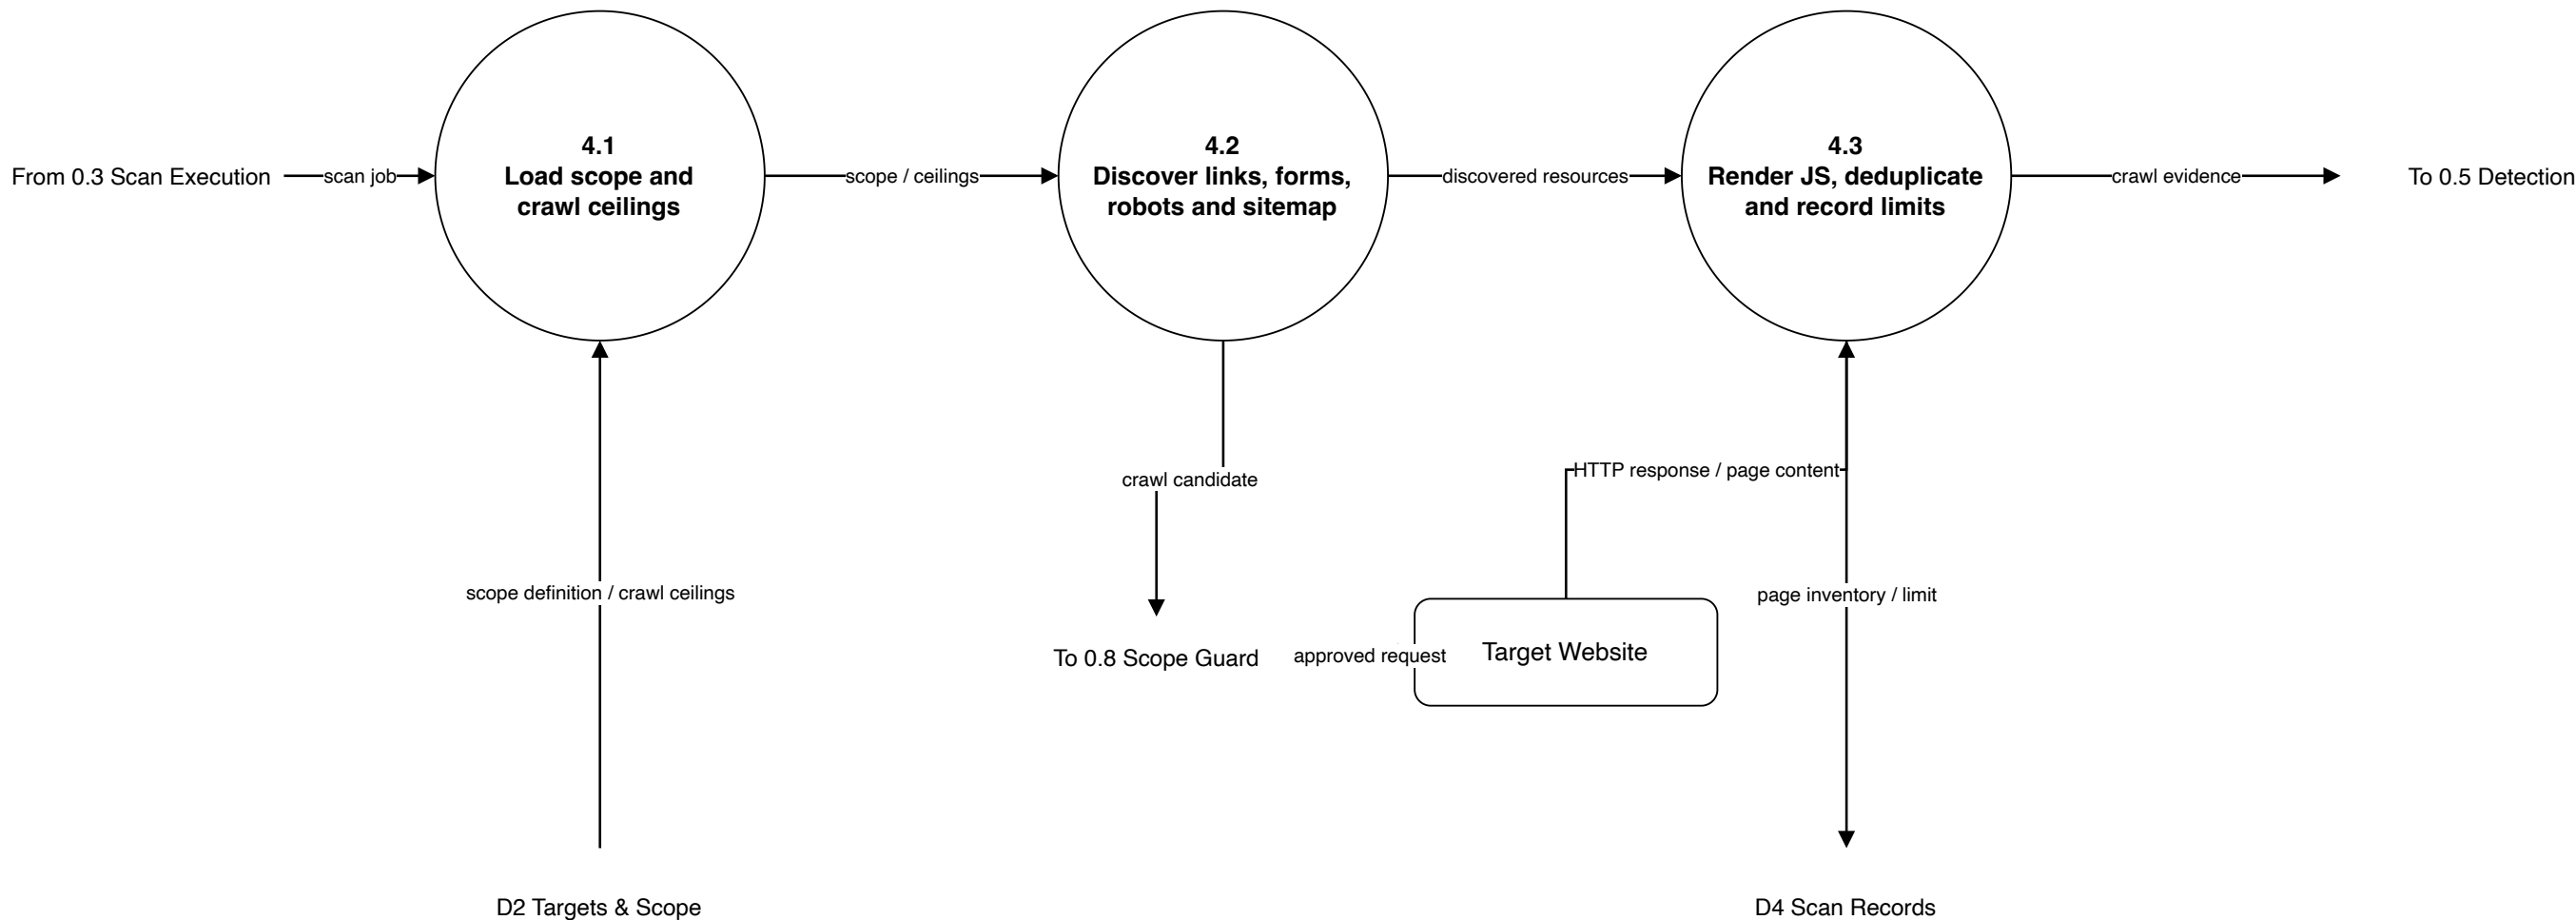

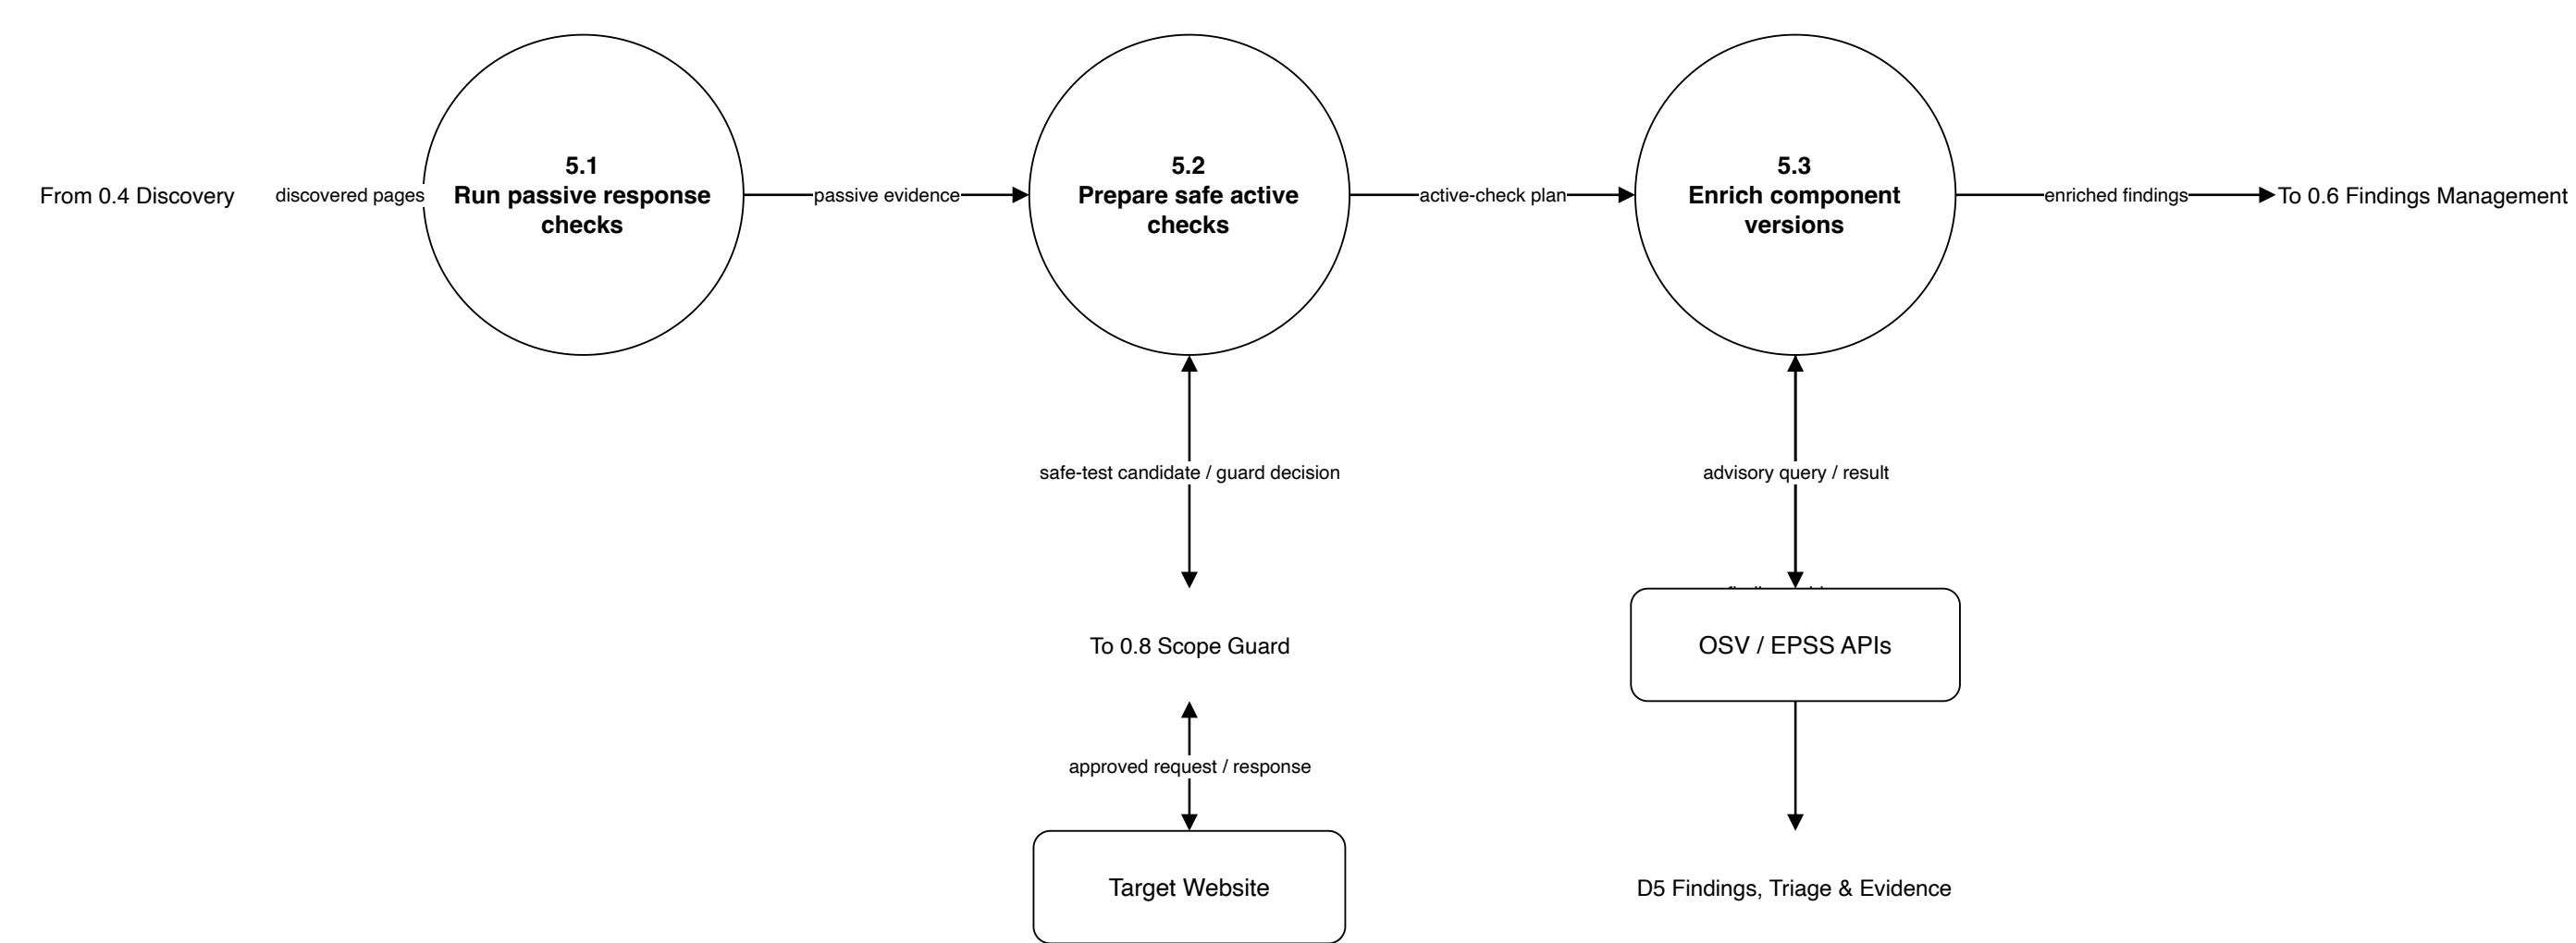

Level 2 DFD - F.3 Scan Configuration and Execution

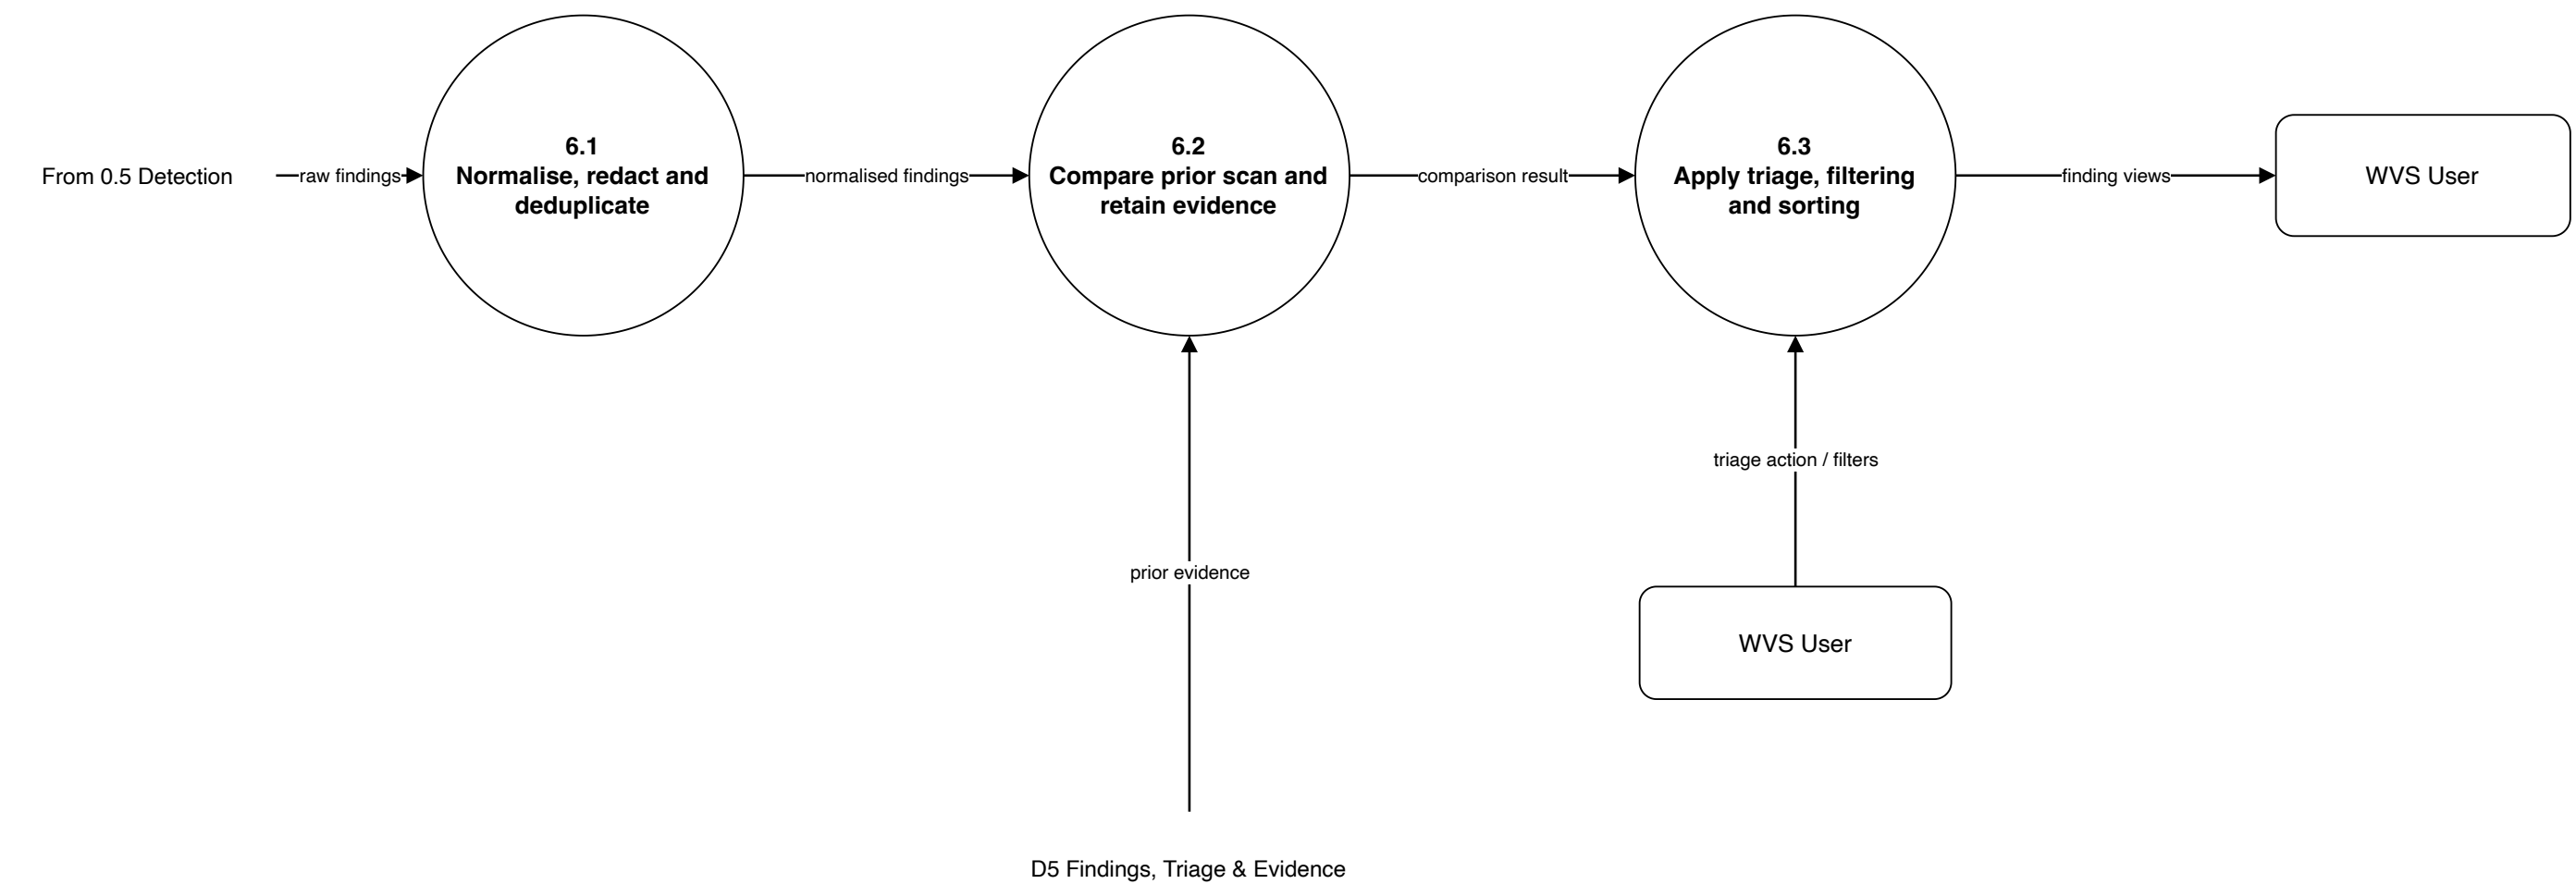

Notation: external entity = rectangle | process = circle | data store = open-ended store

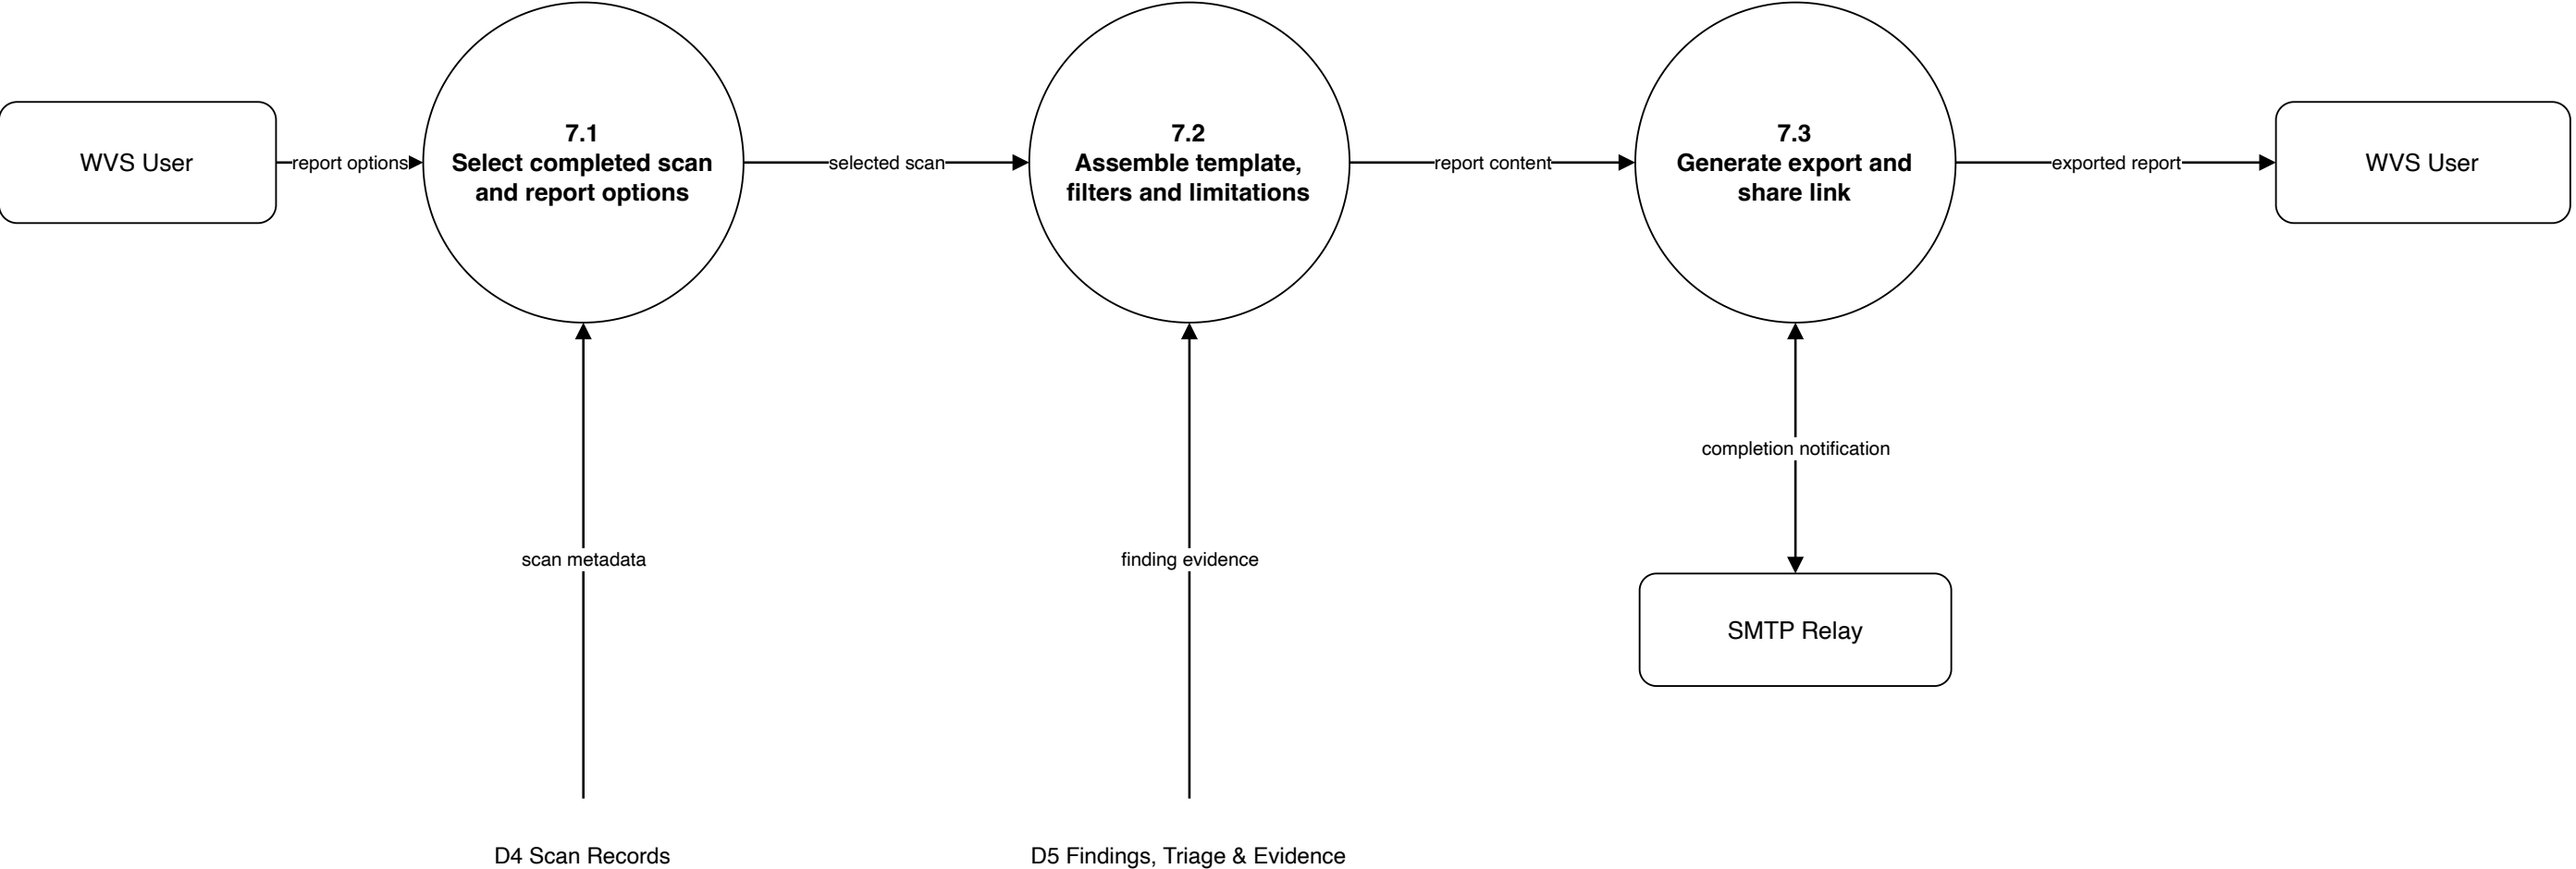

Level 2 DFD - F.4 Discovery (Crawling)

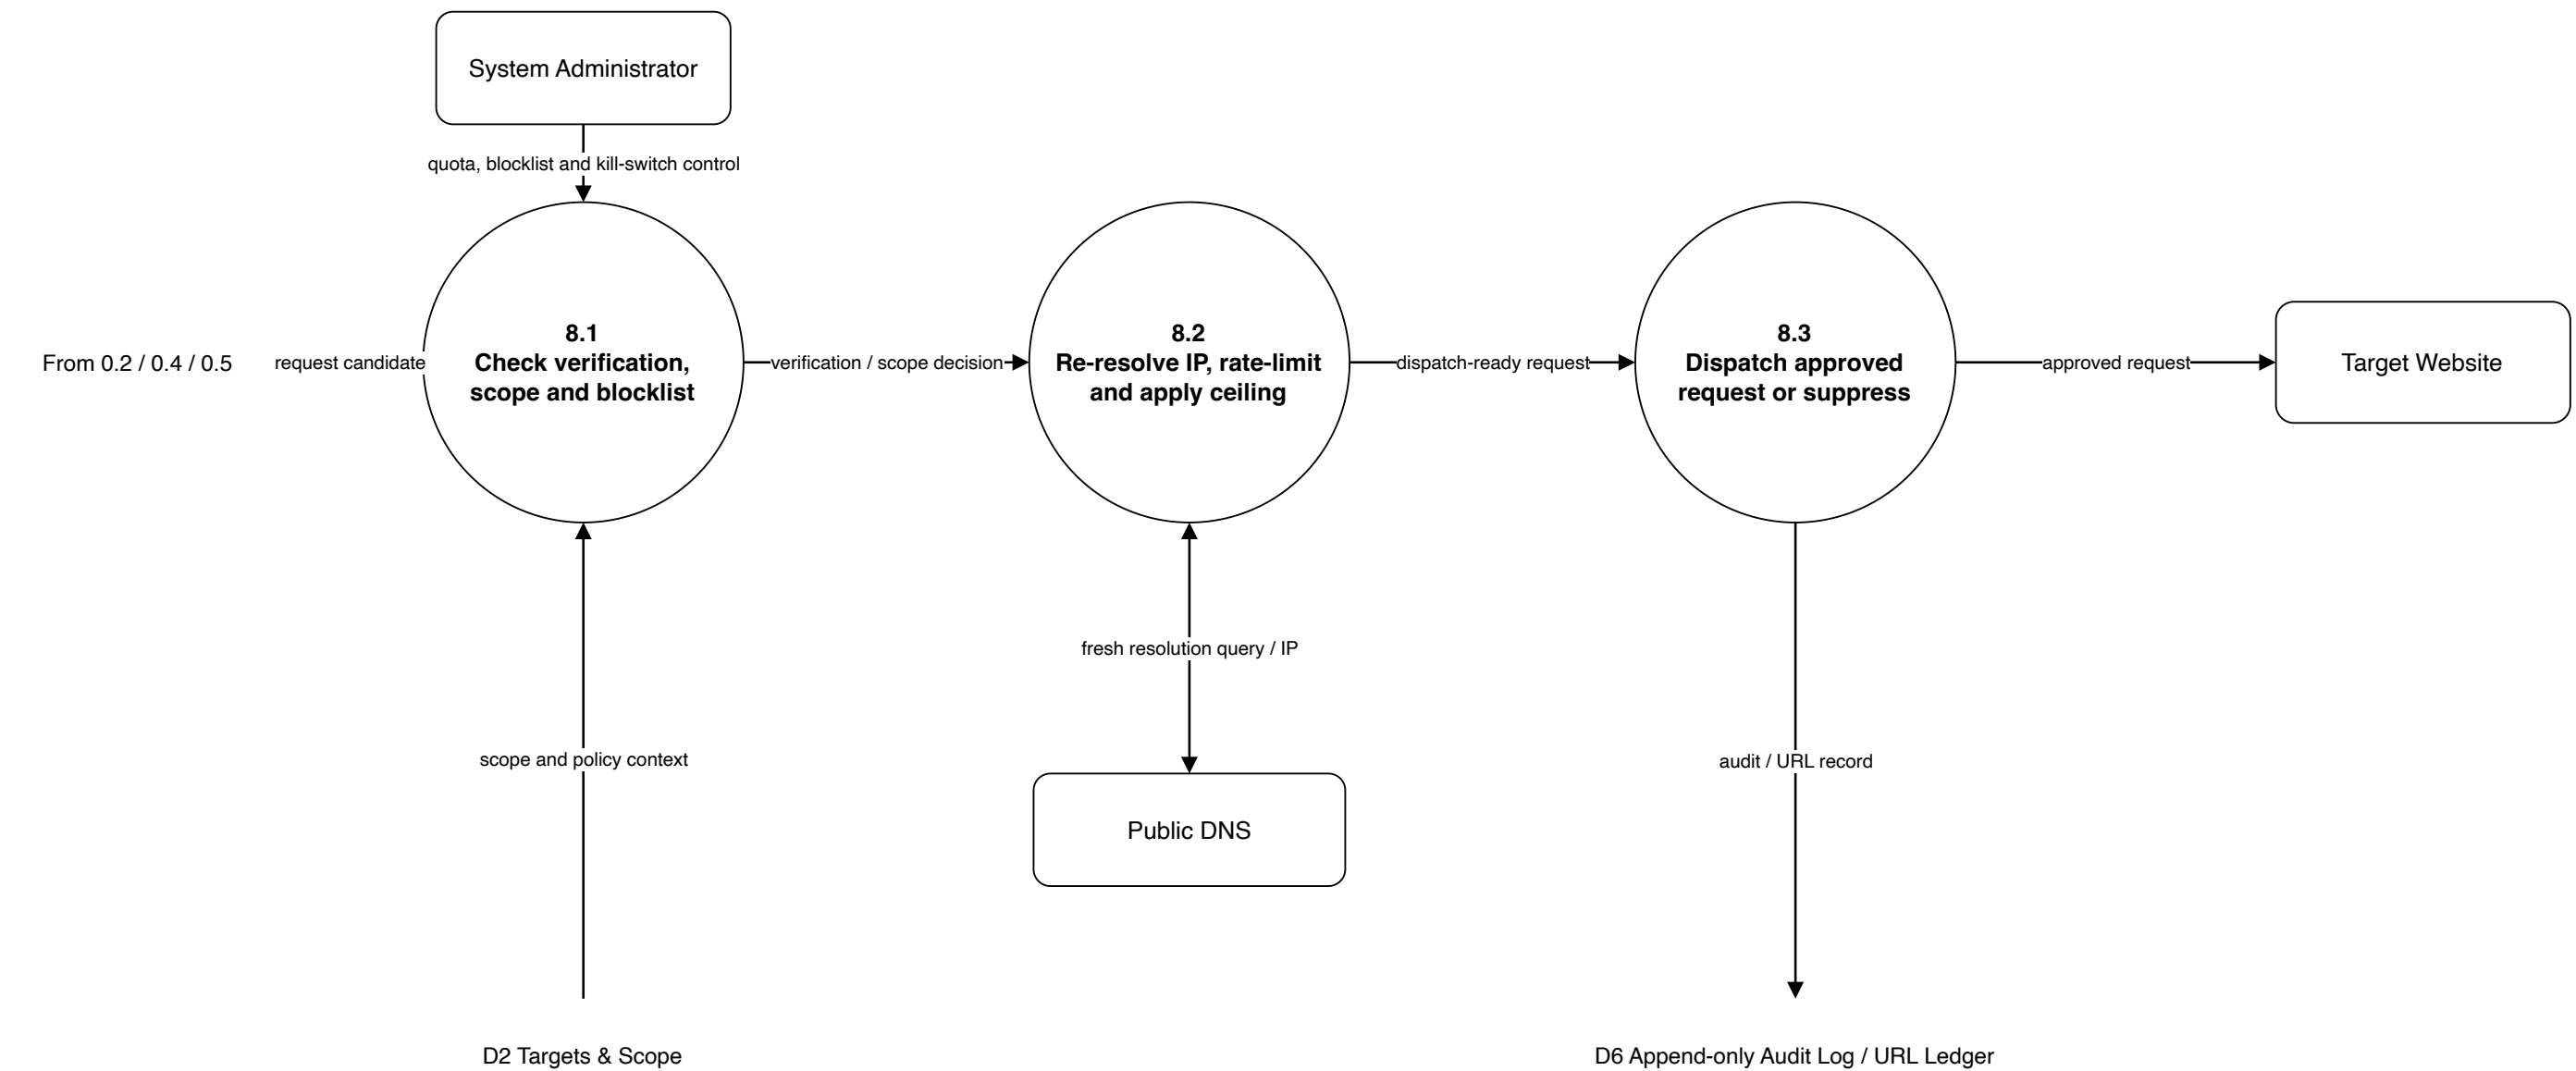

Level 2 DFD - F.7 Reporting and Export

Level 2 DFD - F.8 Safety, Auditing and Administration

Notation: external entity = rectangle | process = circle | data store = open-ended store
