

Level 0 DFD - Website Vulnerability Scanner

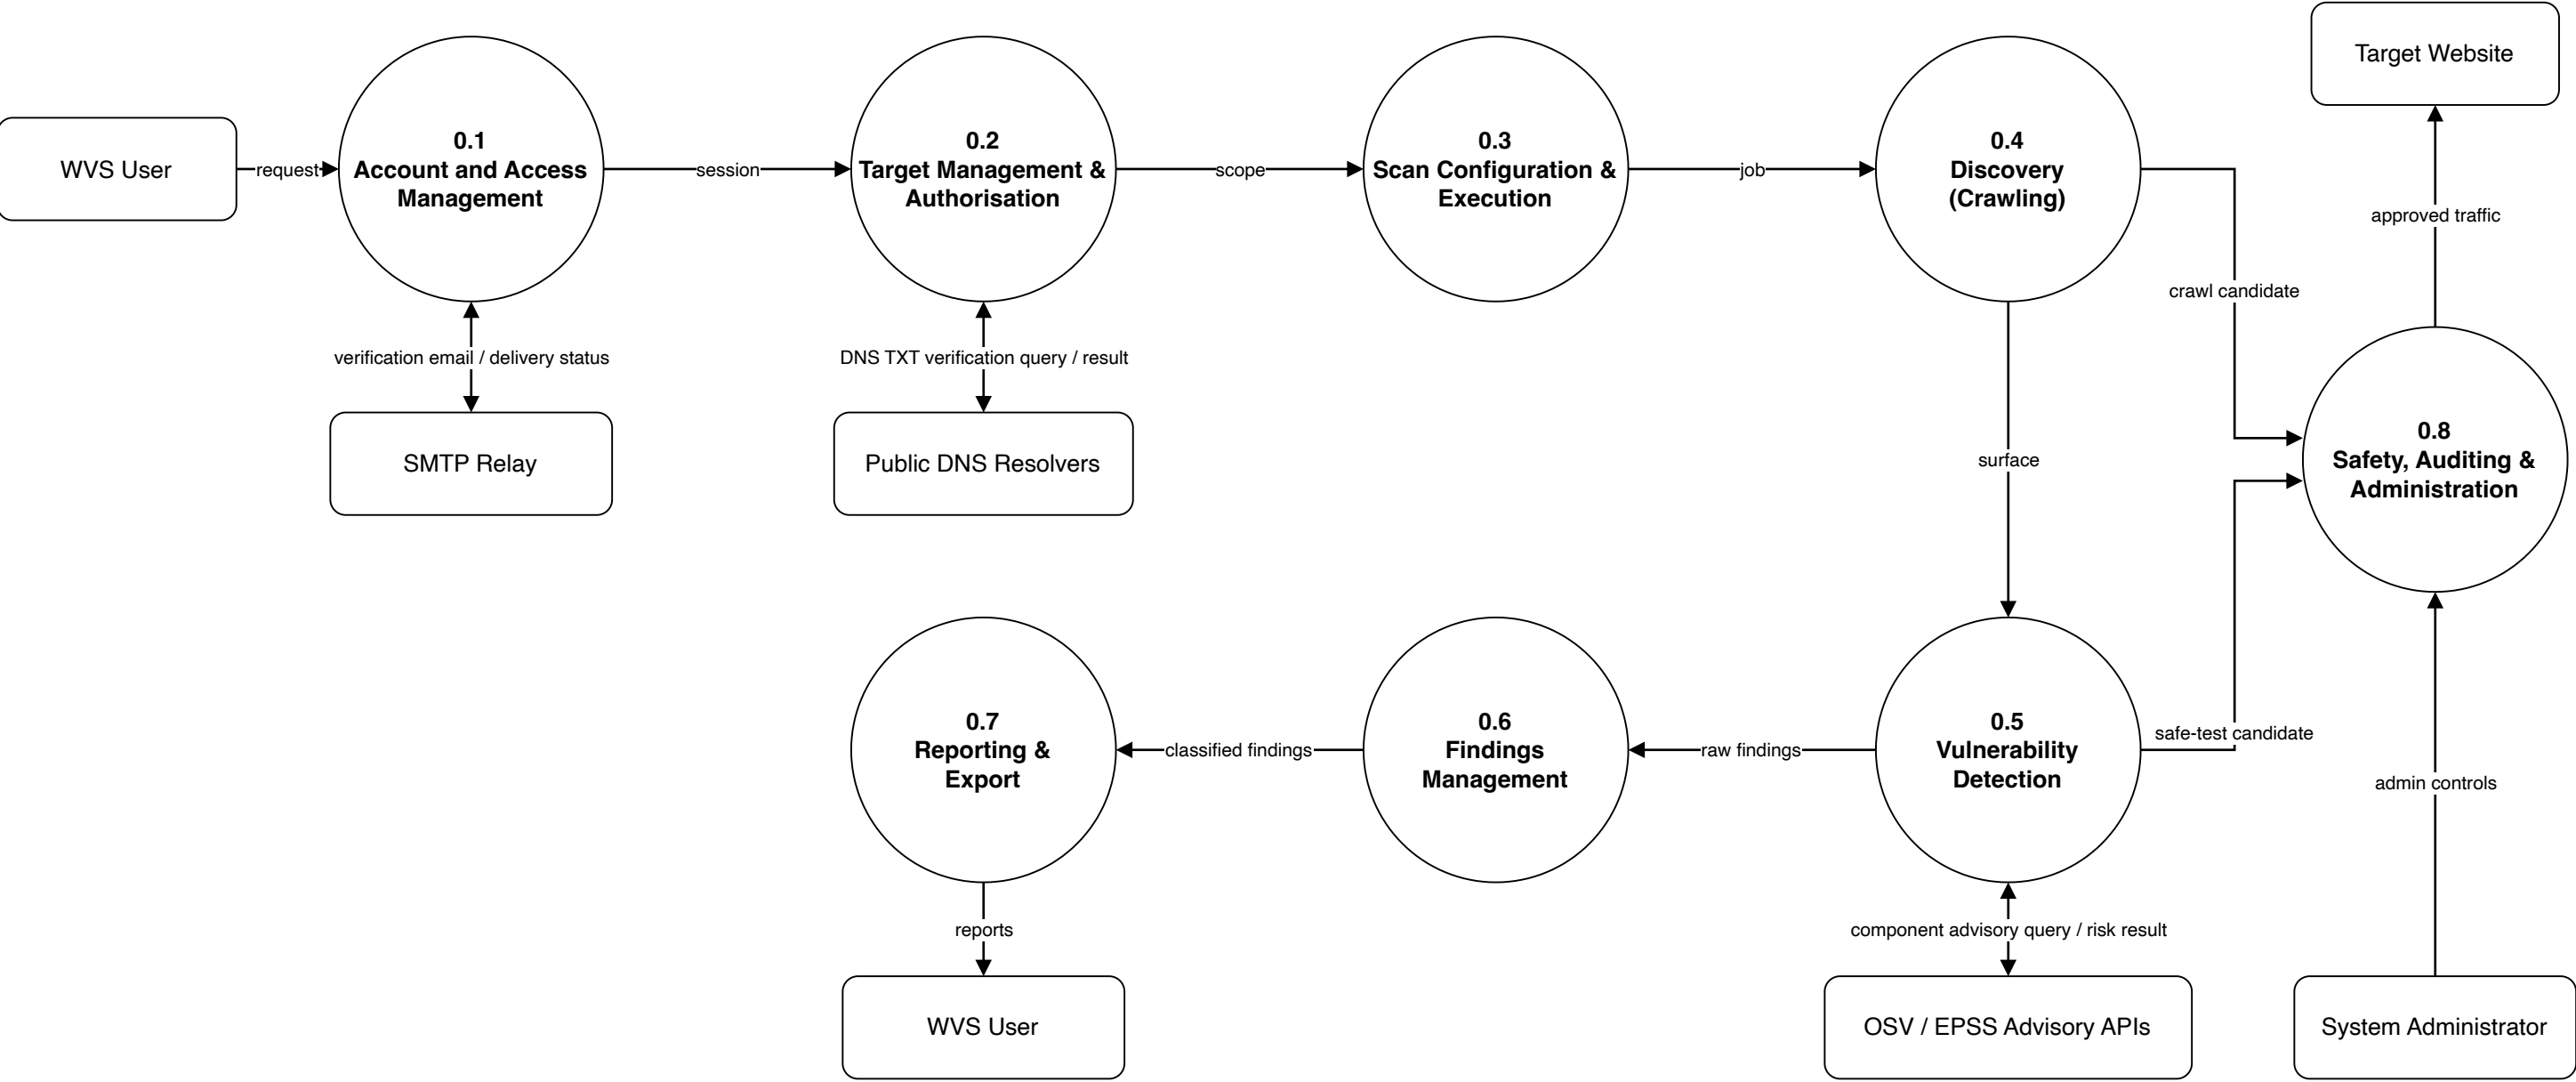

Context diagram

Notation: external entity = rectangle | process = circle | data store = open-ended store

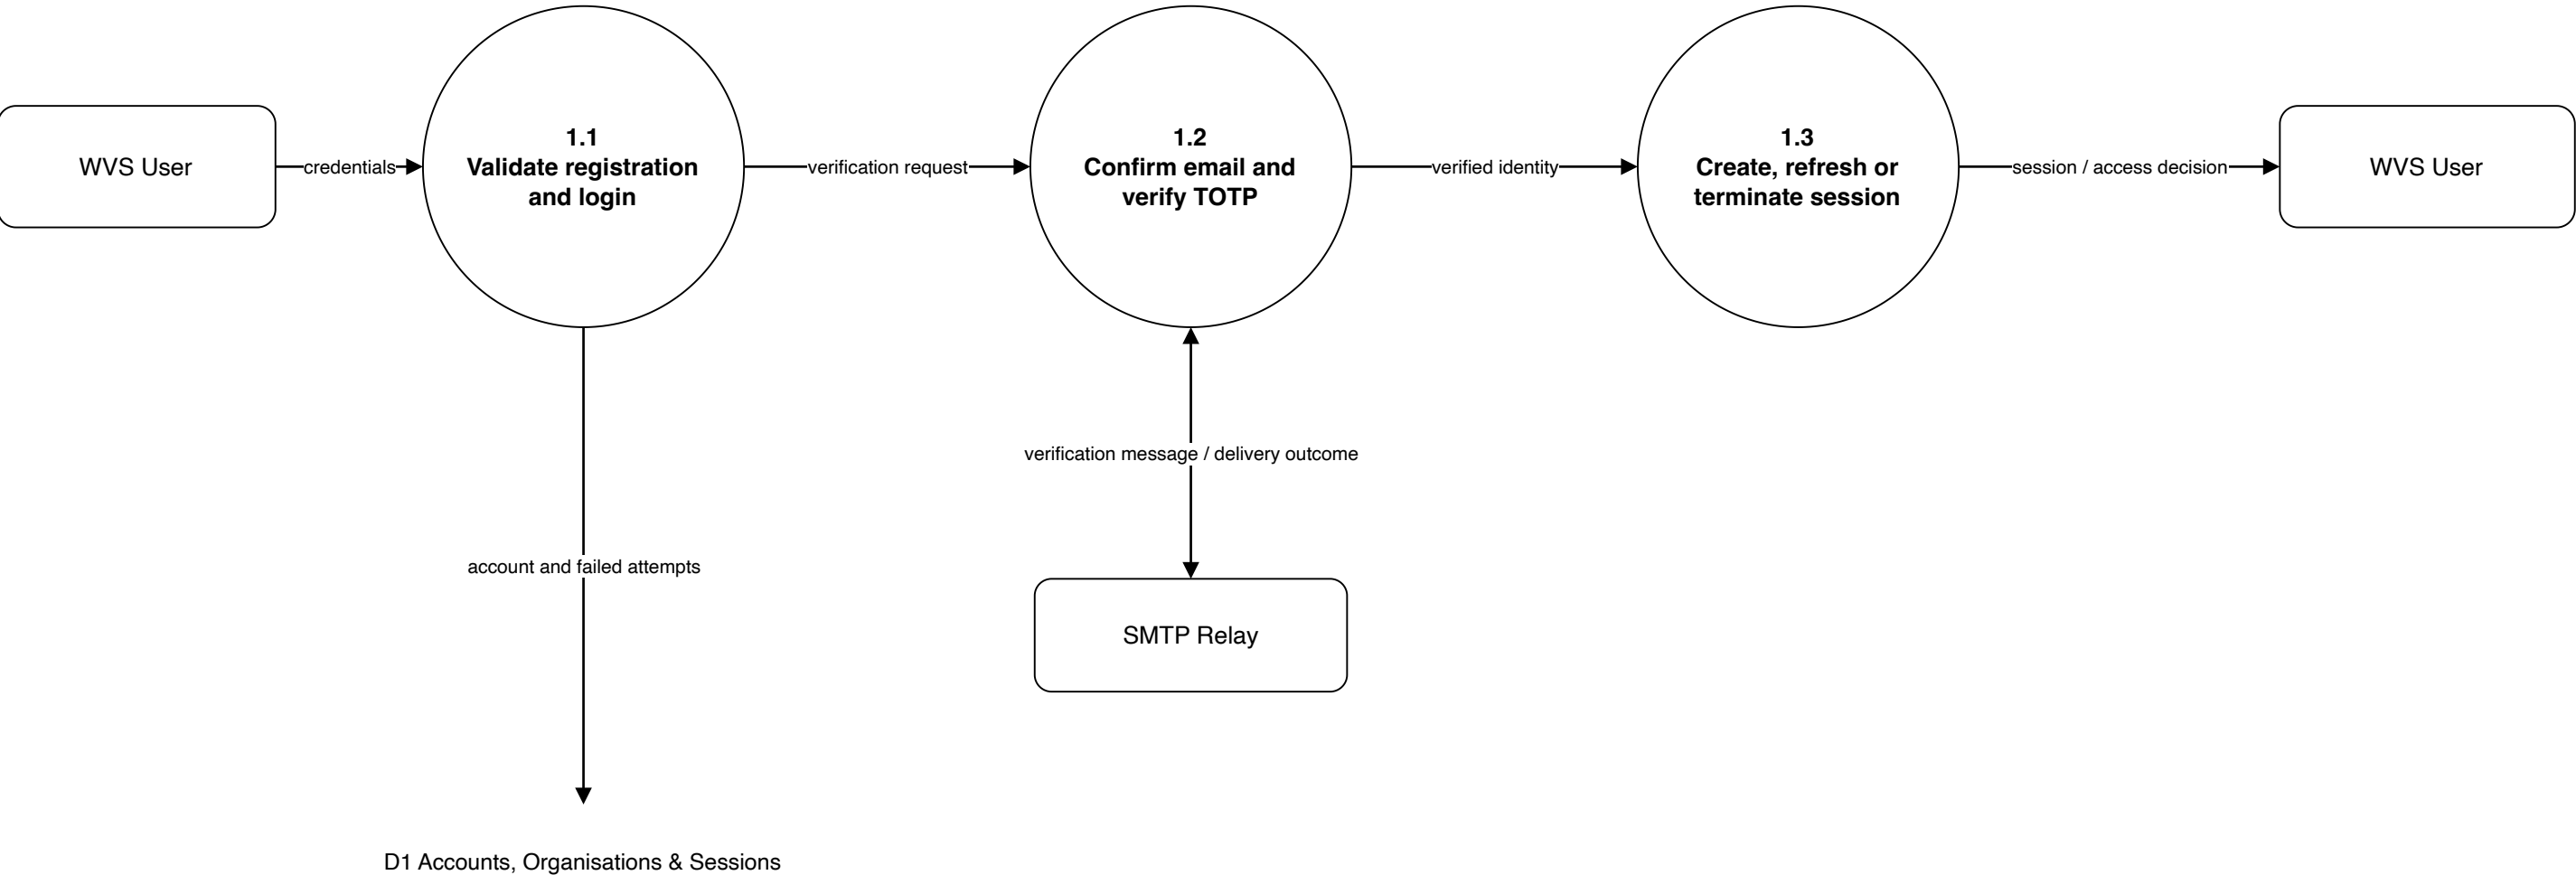

Level 1 DFD - Functional Decomposition

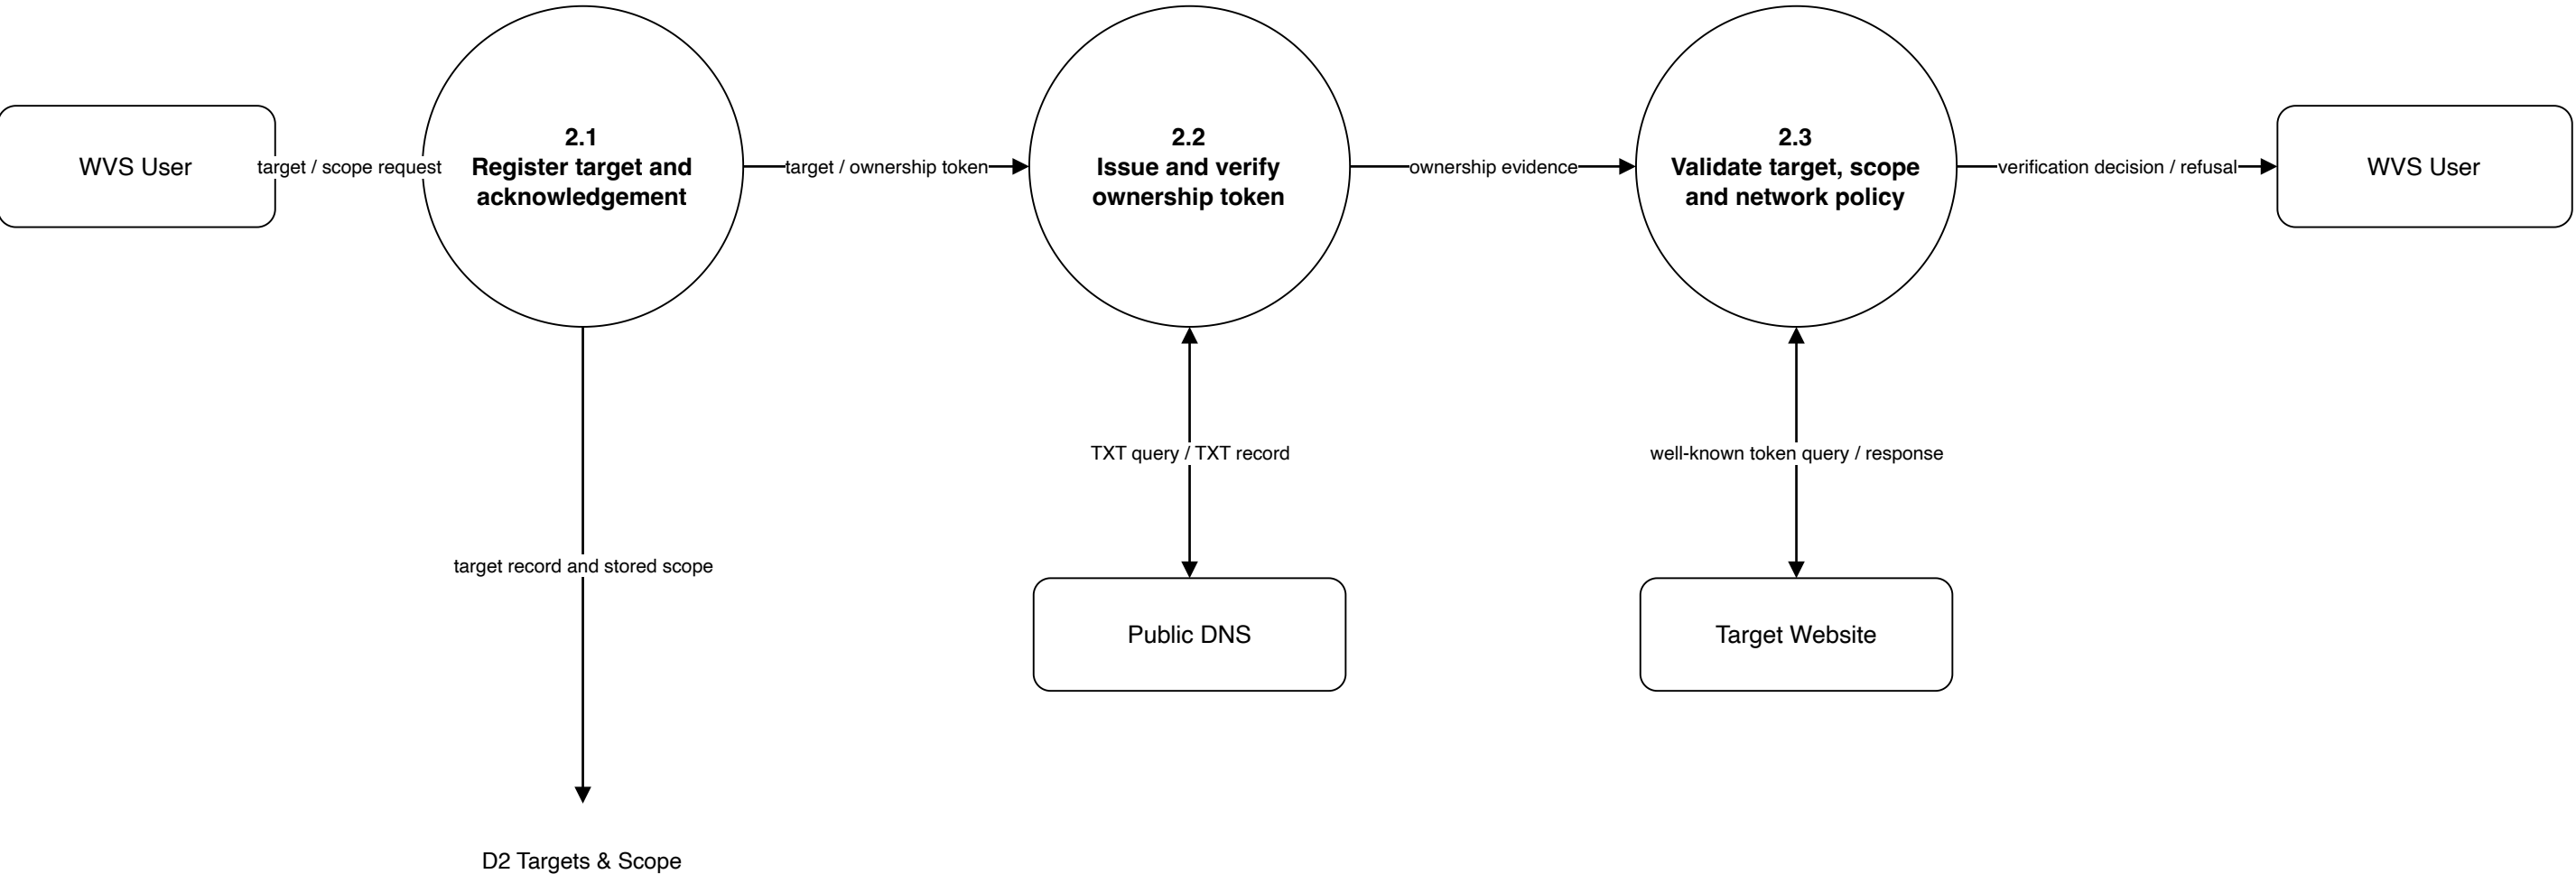

Functional requirements F.1-F.8

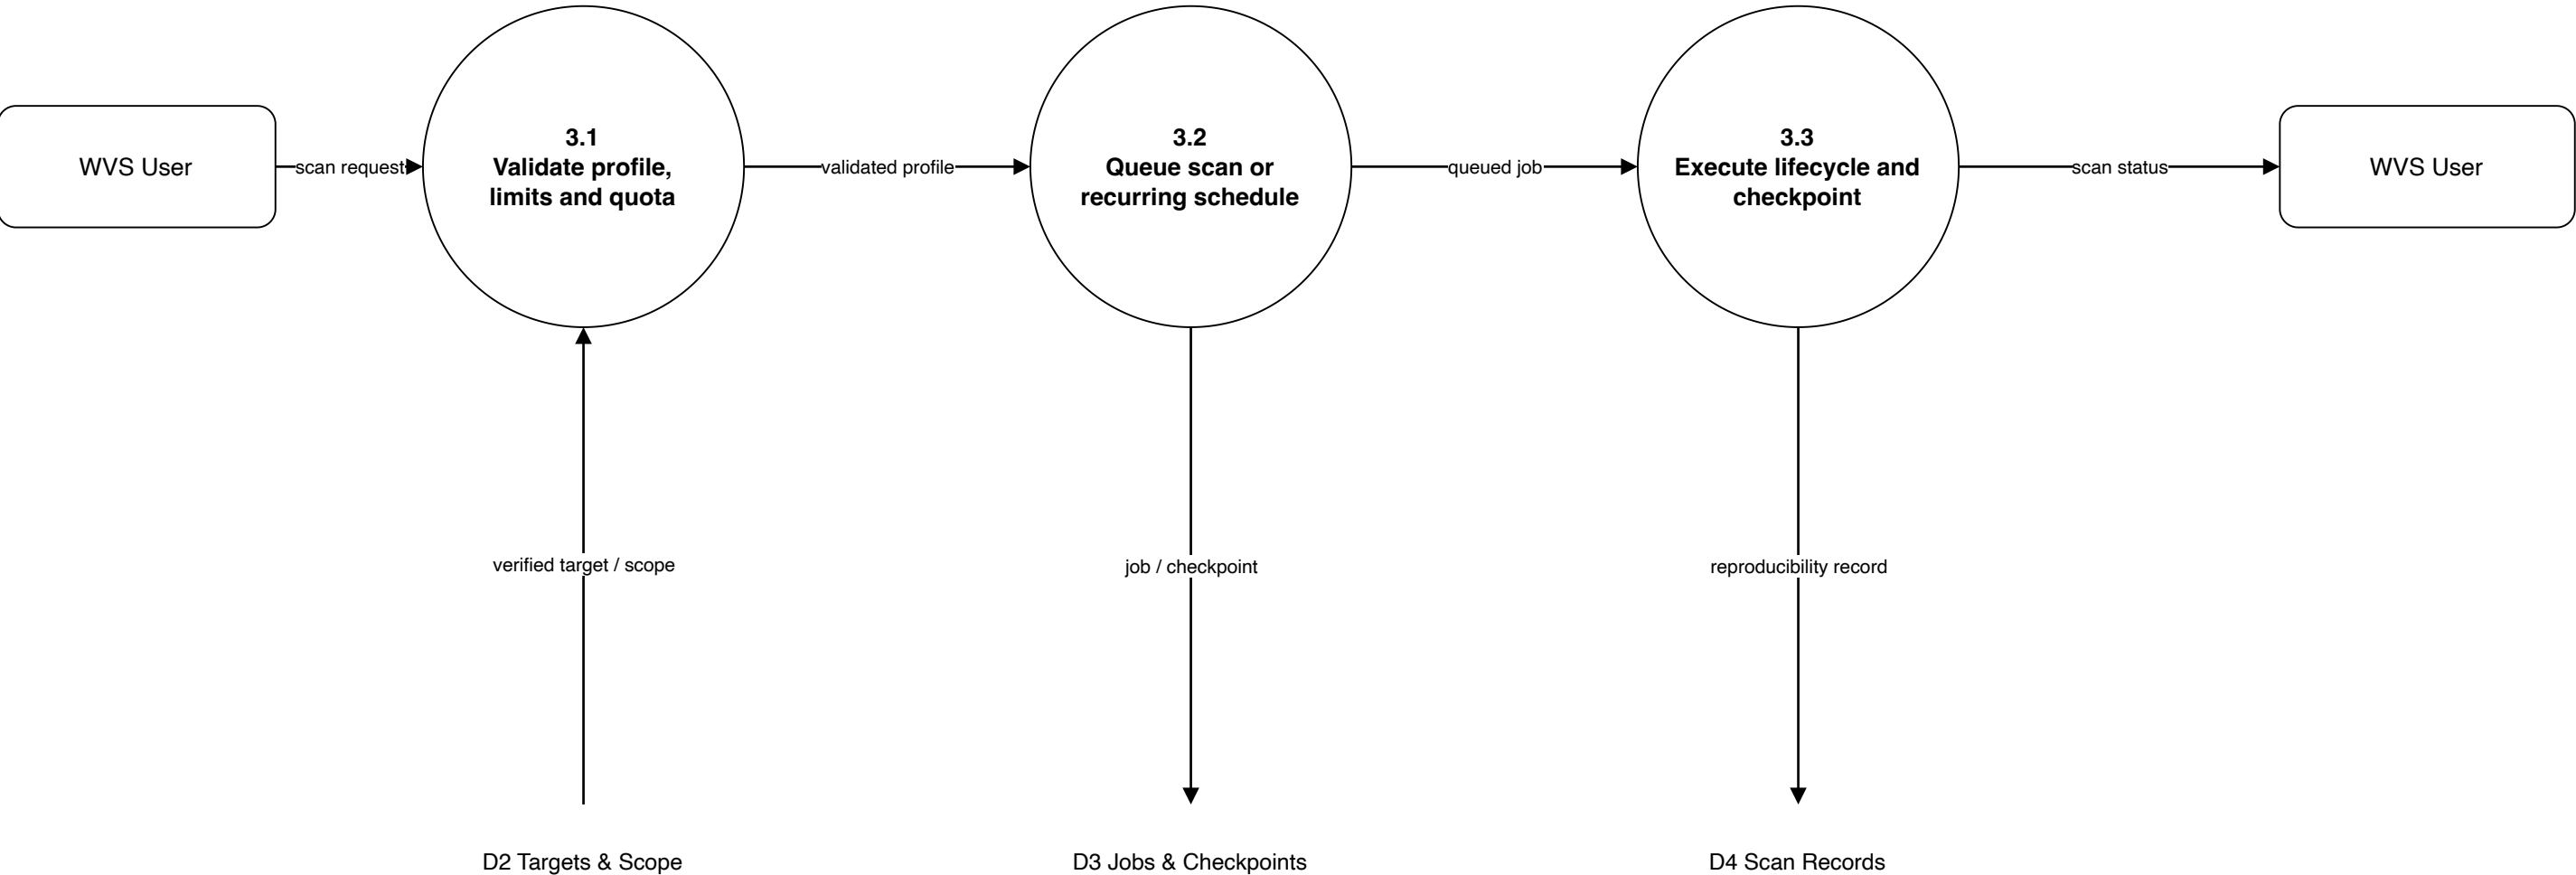

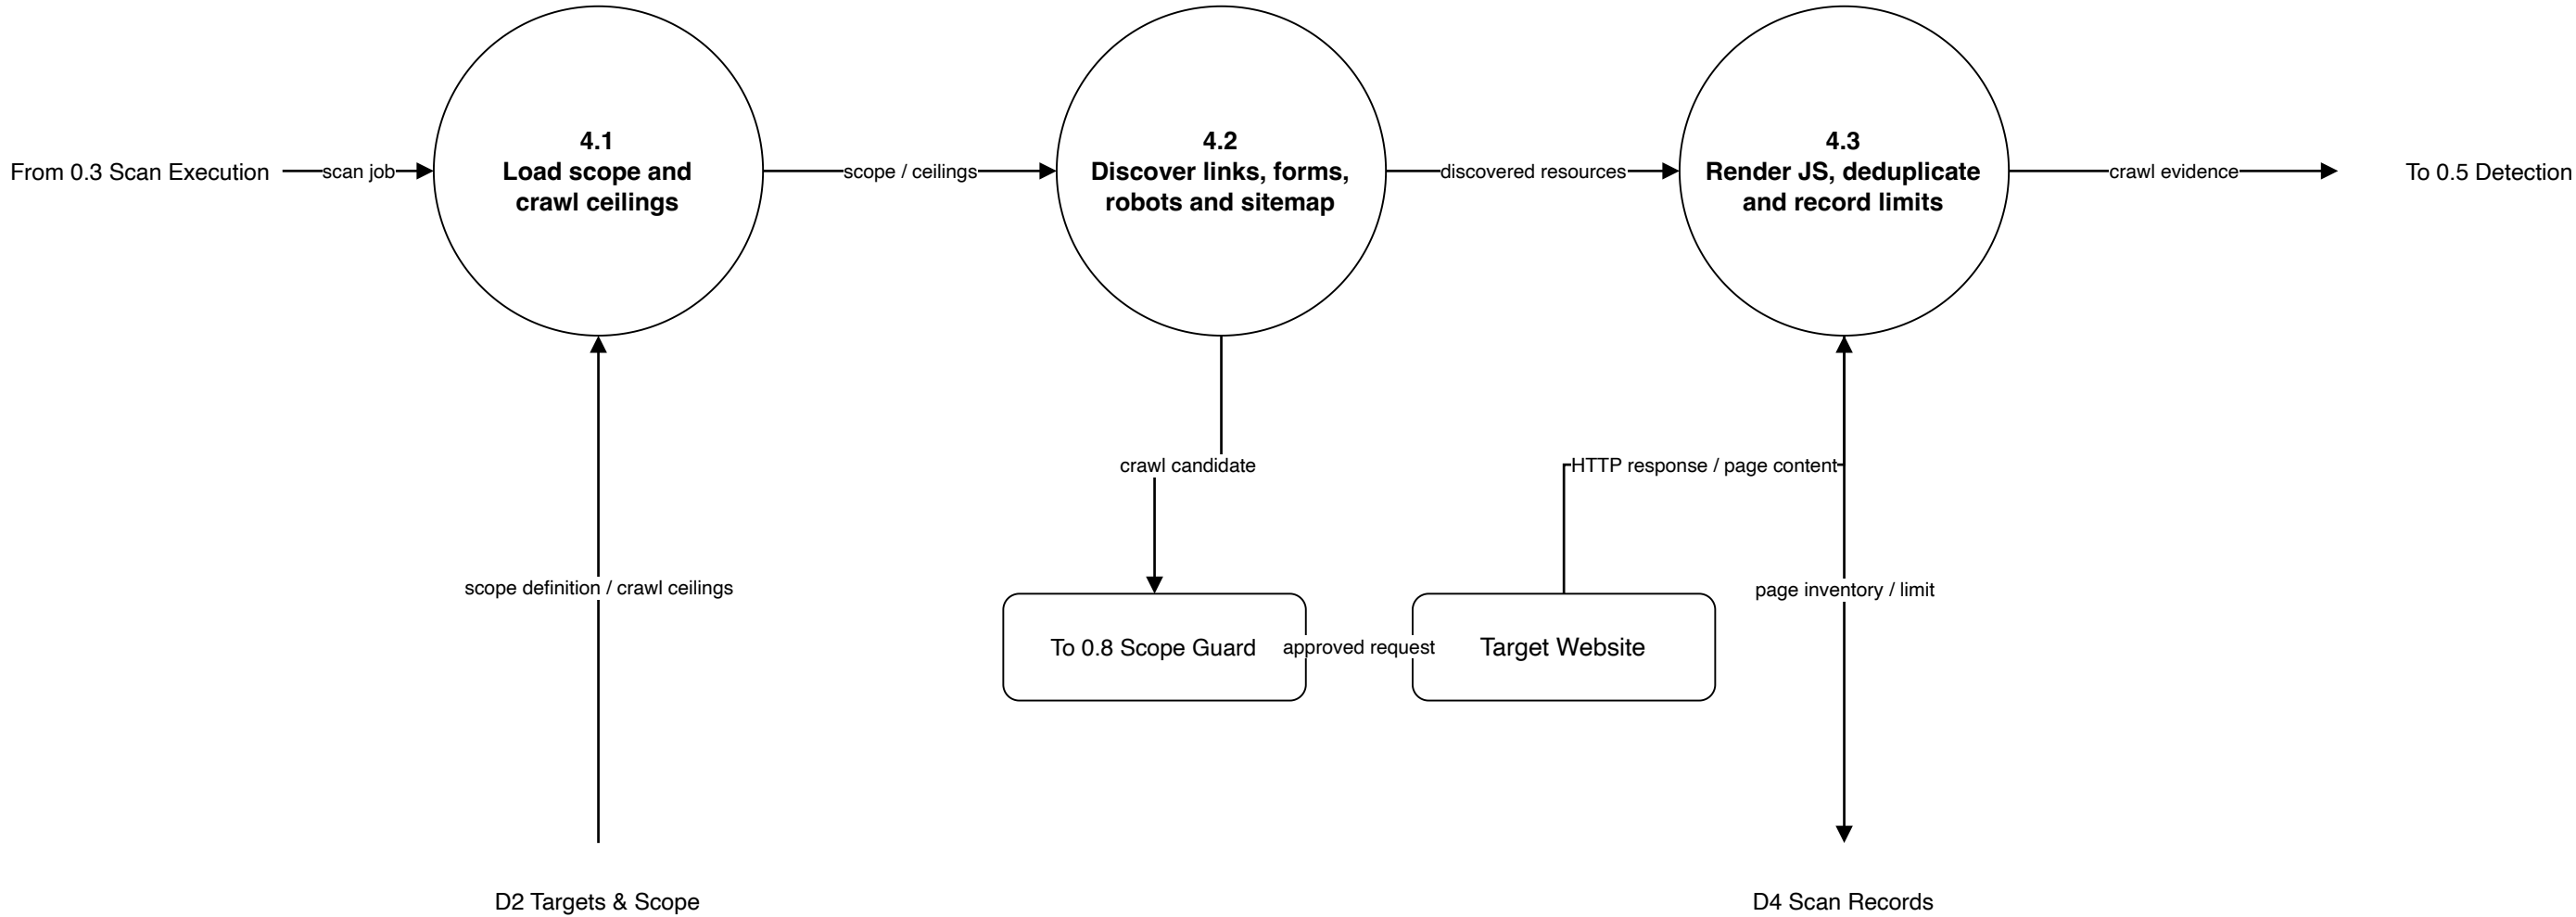

Data stores and their flows are decomposed in the relevant Level 2 DFDs.

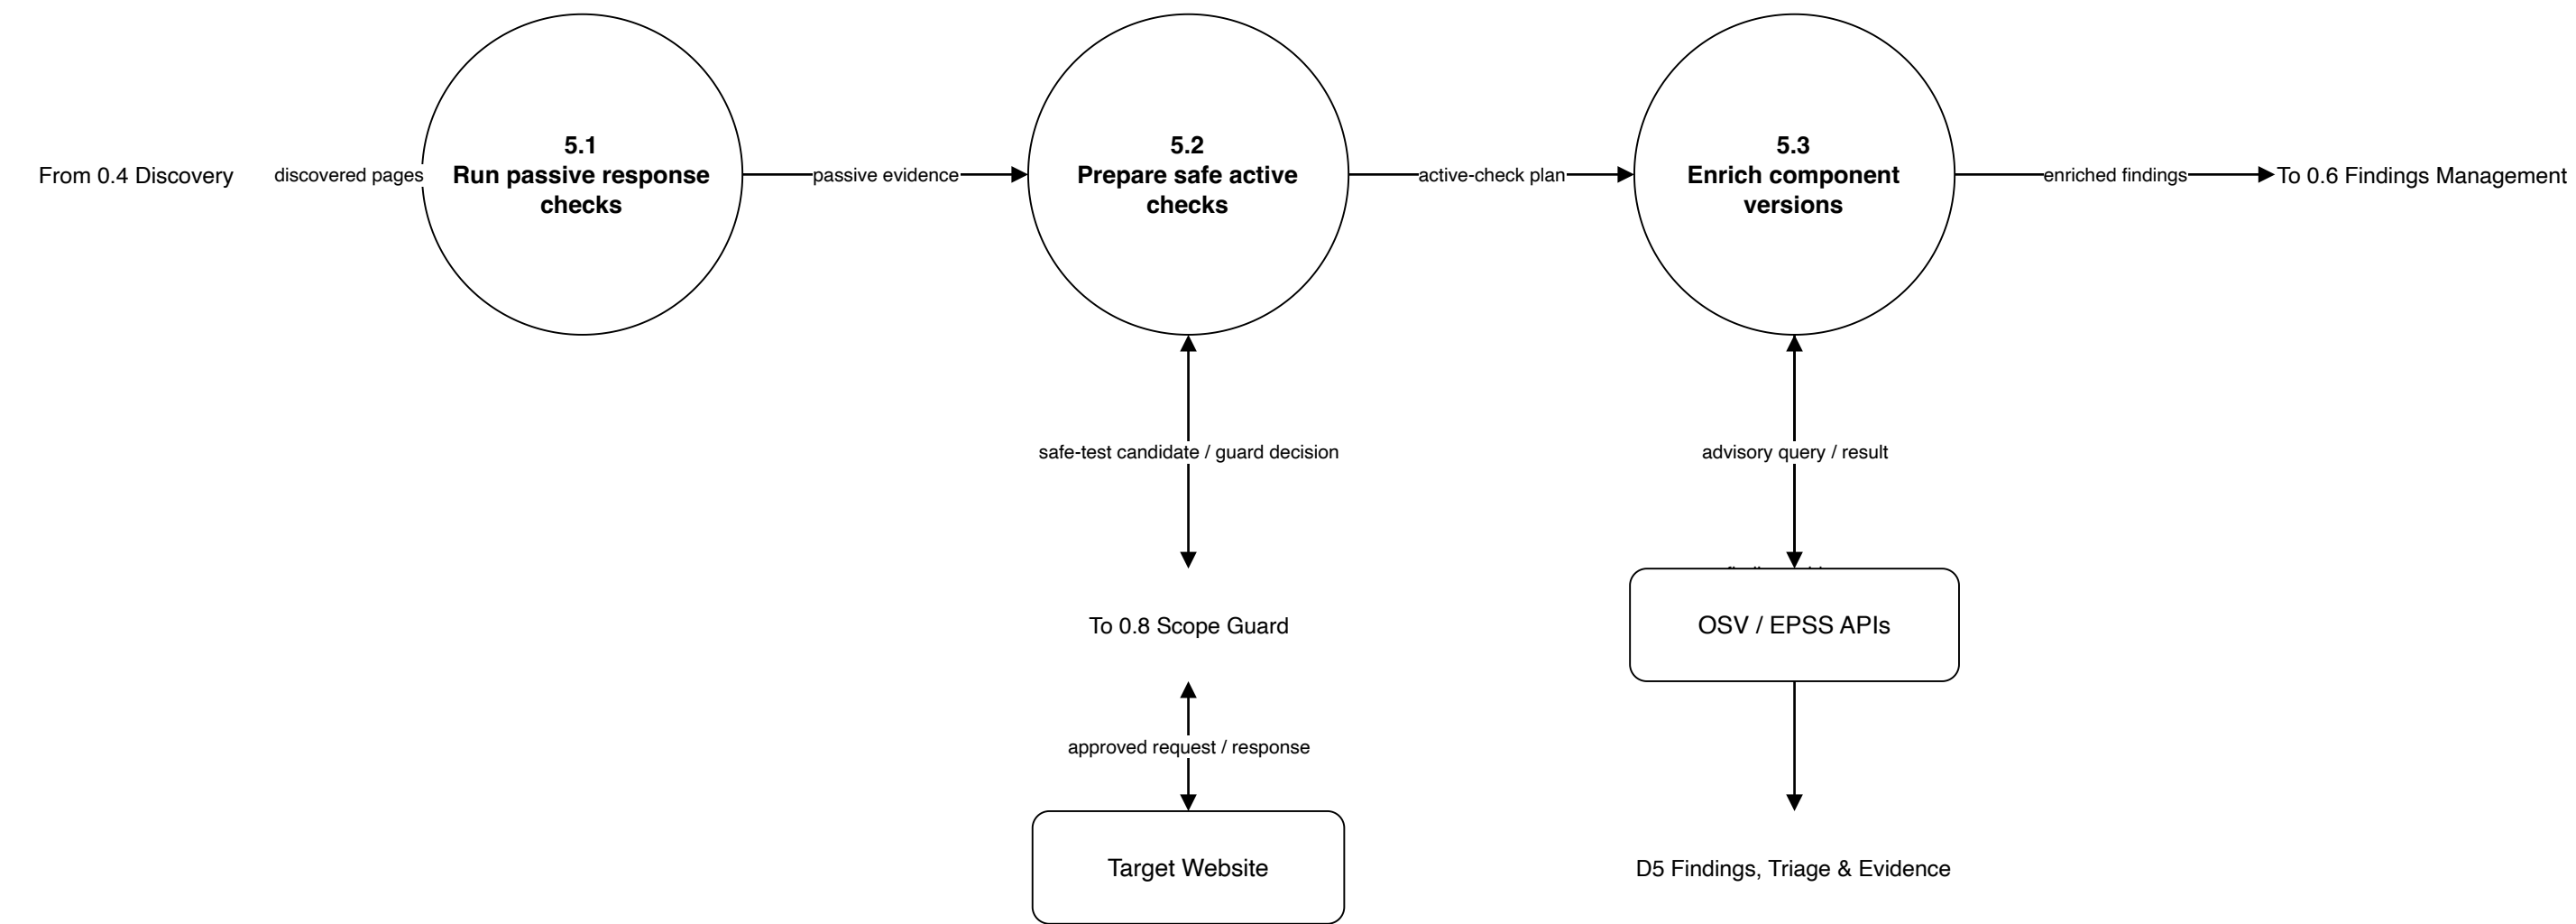

Notation: external entity = rectangle | process = circle | data store = open-ended store

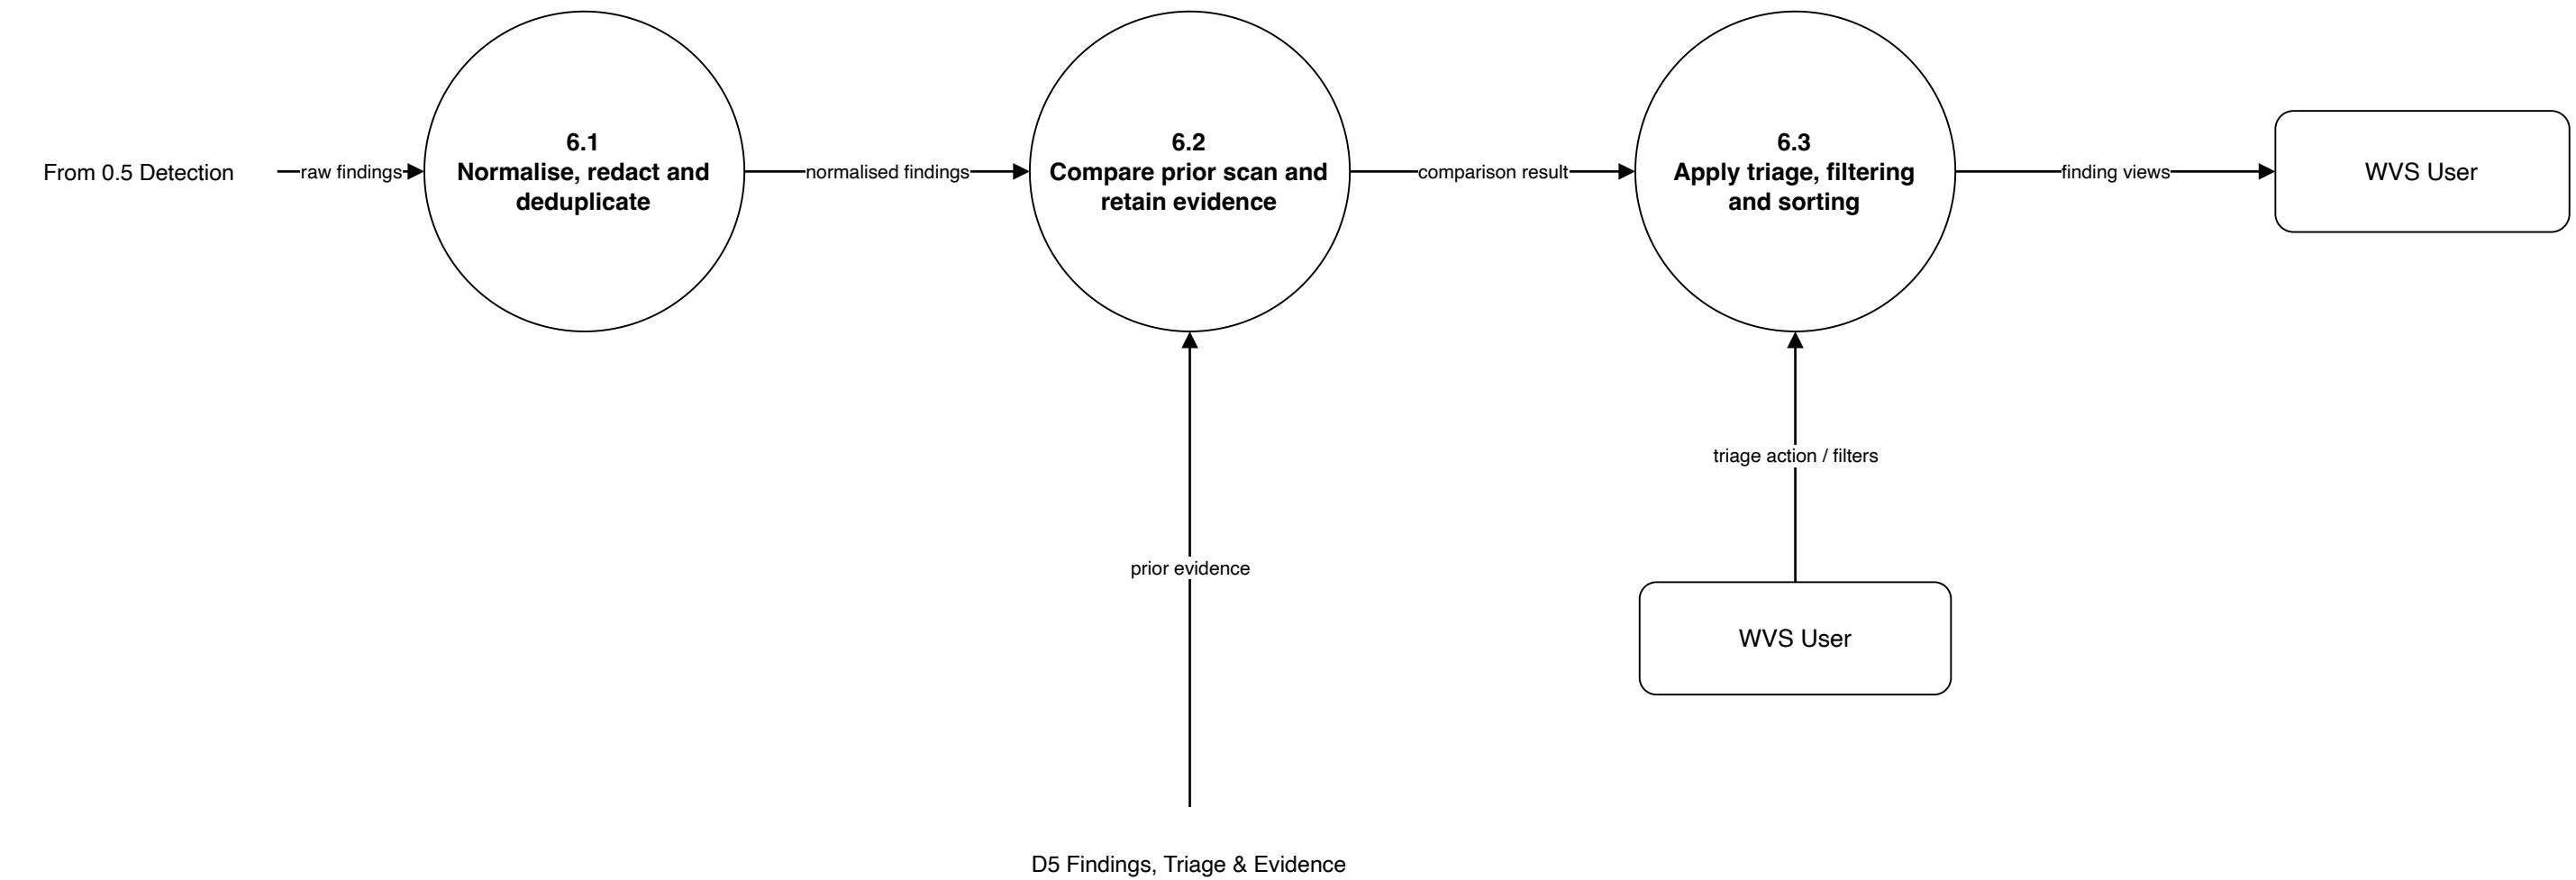

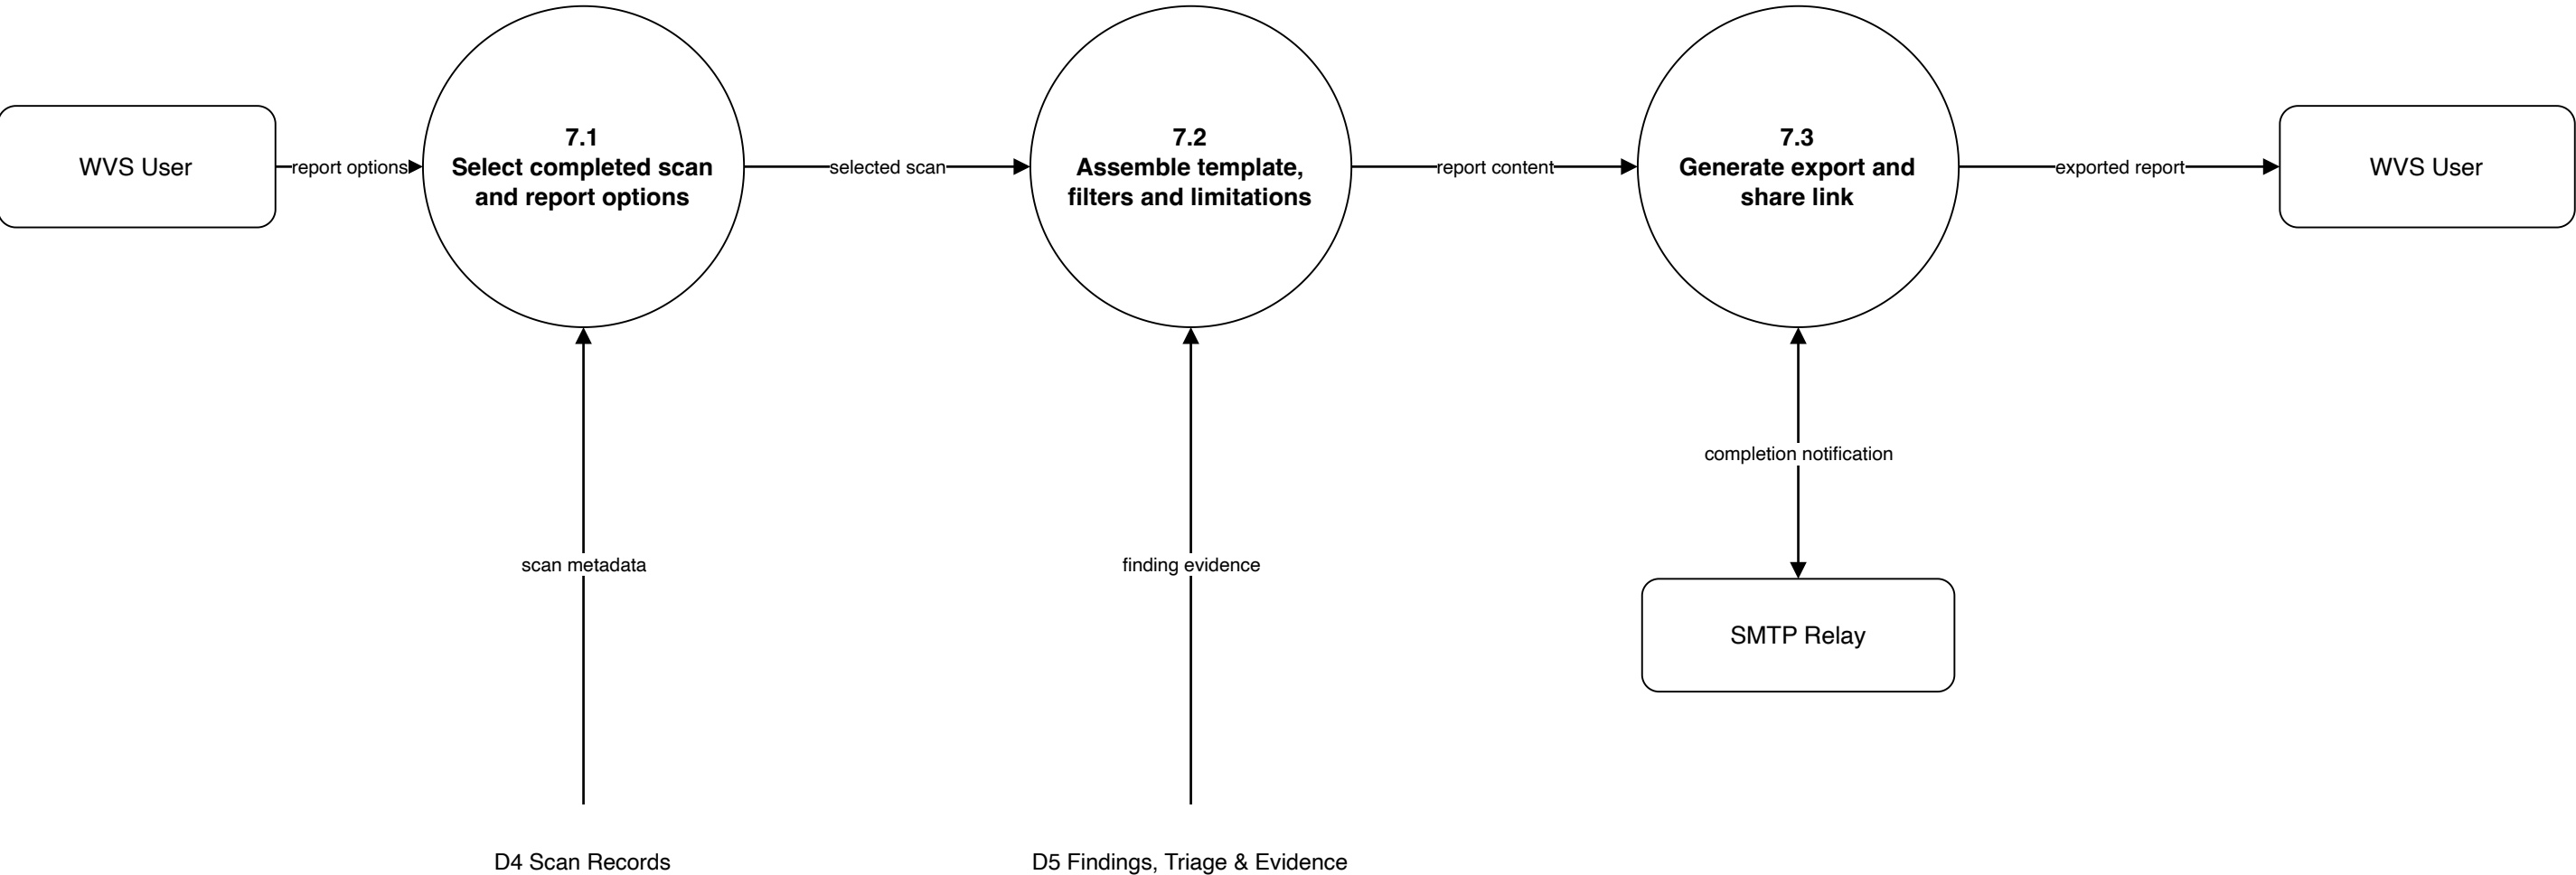

Level 2 DFD - F.8 Safety, Auditing and Administration
